emotive subject and any claim statement or opinion is sensitive to attack from experts and others who have a restricted  
experience or are subjects of commercial or political pressure Many of the facts opinions and forecasts are disputed and may  
be disproved in due course As presented they are true as far as is known but may represent little more than majority  
impression at the time of writing Changes in the seventies are rapid drastic and mainly unanticipated At any time there  
could be a comprehensively influential discovery or incident which could alter the entire pattern of protein supply and  
demand Scientific and academic statements in this book may be criticised by purists but it is to be appreciated that the book  
is intended for universal appreciation Statements are written to be understood within the context If the author offends by  
slightly bending the rules of scientific presentation or by making a claim which might not prove absolutely accurate if all  
factors are analysed he makes no apology When everybody in the world has a full belly and a contented mind there will be  
time to argue about details At present we need an extra 20 million tons of protein per year If this book helps to find it the
