Mallmann Showell, 2020-09-30 A definitive introduction by a highly recognized authority who writes beautifully and clearly Naval Historical Foundation The fact that German submarines almost managed to cut off Britain s vital imports during the First World War hadn t been forgotten by Hitler and when in 1935 he repudiated the Treaty of Versailles Britain magnanimously signed an Anglo German Naval Agreement This allowed the Germans to build their submarine strength up to one third of the Royal Navy s tonnage When war broke out in 1939 German U boats went quickly

into action but with only four years of production and development the main armament of these submarines was considerably weaker than equivalent boats in other navies and many other features such as living conditions were also significantly inferior Yet the German U boat onslaught against British merchant ships in autumn 1940 was highly successful because the attacks were made on the surface at night and from such close range that a single torpedo would sink a ship Soon though Allied technology was able to detect U boats at night and new convoy techniques combined with powerfully armed fast modern aircraft searching the seas meant that by 1941 it was clear that Germany was losing the war at sea Something had to be done The new generation of attack U boats that had been introduced since Hitler came to power needed urgent improvement This is the story of the Types II VII and IX that had already become the workhorse of the Kriegsmarine s submarine fleet and continued to put out to sea to attack Allied shipping right up to the end of the war The Type II was a small coastal boat that struggled to reach the Atlantic the Type VII was perfectly at home there but lacked the technology to tackle well protected convoys while the Type IX was a long range variety modified so it could operate in the Indian Ocean This book by the renowned Kriegsmarine historian explores these attack U boats at length including details of their armament capabilities and crew facilities the story of their development and operational history and just what it was like to operate such a vessel

**The USS Puffer in World War II** Craig R. McDonald, 2008-02-08 Submarines were responsible for about 55 percent of the tonnage of the Japanese fleets sunk during World War II The 22 percent casualty rate of U S submariners was the highest of the military services This volume traces the career of the submarine the USS Puffer from the laying of her keel and her commissioning on April 27 1943 until her departure for the scrap yard in late 1960 Compiled from interviews with former crew members including the author s father Donald B McDonald as well as other contemporary sources it follows the crew of the Puffer through nine war patrols Events recollected include the First War Patrol which resulted in a record setting 38 hour submergence because of enemy fire the dangerous transfer of torpedoes while surfaced in enemy waters and the wild bombardment of Japanese shore installations with the 5 inch deck gun There are numerous wartime photographs and appendices providing a list of awards earned by the crew and a summary of claimed successful attacks Brief biographies of the seven commissioned officers are also included

framework The Economist A marvelously complete and detailed study of World War II submarine warfare an interesting serious and timely book Houston Chronicle A brilliant submarine warfare study Military Review *Hellcats* Peter Sasgen,2010-11-02 A heart stopping true tale of a submarine mission aimed at destroying Japan's merchant marine lifeline and ending World War II By 1945 the U S Navy's submarine force in the Pacific had sunk over a thousand enemy cargo ships and tankers supplying the food weapons and oil Japan needed to continue to fight Yet this once mighty merchant fleet continued to thrive in the Sea of Japan where protected from American submarines by a seemingly impenetrable barrier of deadly minefields they provided a tenuous lifeline for the Japanese Senior American commanders believed that if these enemy ships were sunk Japan would be forced to surrender Here is the incredible story of Operation Barney the daring plot to penetrate those minefields and decimate the enemy fleet The brainchild of the dedicated sub commander Vice Admiral Charles Lockwood the mission would hinge on a new experimental sonar system that would with luck guide American submarines safely past the mines and into the open sea The nine submarines chosen nicknamed Hellcats were tasked with the impossible the combined crews of 760 submariners all knew their chances of survival hinged on an unproven technology and their own nerve Based on original documents and the poignant personal letters of one doomed Hellcat commander Sasgen crafts a classic naval tale of one of World War II's most dangerous missions **Unrestricted Warfare** James F.
