**Science Diplomacy** National Research Council,Policy and Global Affairs,Development, Security, and Cooperation,Committee  
on Global Science Policy and Science Diplomacy,2012-01-29 The United States and other countries around the world face  
problems of an increasingly global nature that often require major contributions from science and engineering that one  
nation alone cannot provide The advance of science and engineering is an increasingly global enterprise and in many areas  
there is a natural commonality of interest among practitioners from diverse cultures In response to challenges the National  
Academies held a workshop in Washington DC in February 2011 to assess effective ways to meet international challenges  
through sound science policy and science diplomacy U S and International Perspectives on Global Science Policy and Science  
Diplomacy summarizes issues addressed during this workshop Participants discussed many of the characteristics of science  
such as its common language and methods the open self correcting nature of research the universality of the most important  
questions and its respect for evidence These common aspects not only make science inherently international but also give  
science special capacities in advancing communication and cooperation Many workshop participants pointed out that while  
advancing global science and science diplomacy are distinct they are complementary and making them each more effective  
often involves similar measures Some participants suggested it may sometimes be more accurate to use the term global  
science cooperation rather than science diplomacy Other participants indicated that science diplomacy is in many situations  
a clear and useful concept recounting remarkable historical cases of the effective use of international scientific cooperation  
in building positive governmental relationships and dealing with sensitive and urgent problems To gain U S and international  
perspectives on these issues representatives from Brazil Bangladesh Egypt Germany Jamaica Kazakhstan Malaysia Morocco
