Software Agents For Future Communication Systems:

Software Agents for Future Communication Systems Alex Hayzelden, John Bigham, 2012-12-06 Agent technology has recently become one of the most vibrant and fastest growing areas in information technology And advanced digital communication is a central enabling technology for the coming information society So software agents and their exploitation for future communication systems are attracting particular attention from the research and development community as well as from economic and user communities interested in everyday private and professional digital communication applications This monograph like anthology is the first systematic introduction to software agents and future communication systems Fifteen coherently written chapters by leading software agent researchers provide complementary coverage of the relevant issues Multi agent systems and mobile agent approaches are presented in a well balanced way and applied to most important topics in future communication systems In addition the volume editors have provided a detailed introductory survey chapters

Quality Assurance of Agent-Based and Self-Managed Systems Reiner Dumke, Steffen Mencke, Cornelius Wille, 2009-08-26 The challenges in implementing intelligent and autonomous software systems remain the development of self adapting systems self healing applications corporate global creation and collaborated robotic teams With software agent technology widely recognized as a key approach in implementing such global infrastructure the importance of the role of *Agent Technology for Communication Infrastructures* Alex L. G. Hayzelden, Rachel A. Bourne, 2001-02-08 Agent Technology is a fast growing area of research in Artificial Intelligence and Computer Science Agents are autonomous problem solving entities residing in an environment able to solve problems roam network infrastructures adapt to changes in their environment and interact with other agents Offering a useful snapshot of the current status of the field this text focuses sharply on the upcoming convergence of intelligent software and communications systems Contributions from leading authorities in the field covering a wide range of issues Demonstrates the increased capabilities of agents that are not currently achievable using traditional standards based network signalling This valuable reference resource is essential reading for researchers or practitioners interested in applying agent technology or in business to develop next generation distributed applications as well as scientists and engineers in R D departments and lecturers and researchers in telecommunications and computer science

Foundations of Intelligent Systems Ning Zhong, Zbigniew W Ras, Shusaku Tsumoto, Einoshin Suzuki, 2003-10-10 This volume contains the papers selected for presentation at the 14th International Symposium on Methodologies for Intelligent Systems ISMIS 2003 held in Maebashi City Japan 28 31 October 2003 The symposium was organized by the Maebashi Institute of Technology in co operation with the Japanese Society for Artificial Intelligence It was sponsored by the Maebashi Institute of Technology Maebashi Convention Bureau Maebashi City Government Gunma Prefecture Government US AFOSR AOARD the Web Intelligence Consortium Japan Gunma Information Service Industry Association and Ryomo Systems Co Ltd ISMIS is a conference series that was started in 1986 in Knoxville Tennessee Since then it has been held in Charlotte North

Mobile Agents for Telecommunication Applications, 2003 **Agents and Multi-Agent Systems in Construction** Chimay Anumba, Zhaomin Ren, O.O. Ugwu, 2005-05-15 This book describes current advances and future directions in the theory and application of intelligent agents and multi agent systems in the Architecture Engineering and Construction AEC sector It is the product of an international effort involving a network of construction IT and computing researchers investigating different aspects of agent theory and applications The contributed chapters cover different perspectives and application areas and represent significant efforts to harness emerging technologies such as intelligent agents and multi agent systems for improved business processes in the AEC sector The first four chapters cover the theoretical foundations of agent technology whilst the remaining chapters deal with the application of agent based systems in solving problems in the construction domain

Mobile Agents, 2002 **Foundations of Intelligent Systems**, 2000 **Large Scale Systems** F. G. Filip, I. Dumitrache, S. S. Iliescu, 2002 This volume contains the papers presented at the 9th IFAC Symposium on Large Scale Systems Theory and Applications LSS 2001 held in Bucharest Romania 18 20 July 2001 Its aim was to address the control aspects of those industrial economic social and environmental systems whose characteristics are high dimensionality non linearity and uncertainty associated with a multitude of structural forms with intense and time critical information exchange and efficient co ordination The symposium covered all major aspects of large scale complex systems including methodological aspects technological solutions and practical applications methodological aspects and those devoted to practical applications Several invited sessions were organised including papers from leading world experts The papers are ordered in accordance with the technical sessions Session topics include methodology and application fields traditional to this Symposium series Topics covered include the following modelling and model reduction decentralized control and estimation hierarchical control intelligent and fuzzy control nonlinear dynamics in complex systems complex systems theory and analysis water gas power systems large scale CIMs and production planning and scheduling communication and information systems transportation systems modelling and control of wastewater treatment plants and societal systems modelling planning and management technical programme such as decision support systems and risk and governance in large scale systems More recent issues such as risk management and human decision in large scale systems were well received by the symposium participants and provide an extra dimension to volume

NOMS 2002 Rolf Stadler, Mehmet Ulema, 2002 [Applications and Innovations in Intelligent Systems XI](#) Max A. Bramer, Richard Ellis, Ann Macintosh, 2004-02-03 The papers in this volume are the refereed application papers presented at AI 2003 the Twenty third

SGAI International Conference on Innovative Techniques and Applications of Artificial Intelligence held in Cambridge in December 2003 The papers present new and innovative developments in the field divided into sections on Personalisation E Commerce and Resource Management Hazard Prediction Fault Diagnosis and Design Medical and Social Services and Image Recognition Knowledge Bases and Attribute Selection This is the eleventh volume in the Applications and Innovations series The series serves as a key reference on the use of AI Technology to enable organisations to solve complex problems and gain significant business benefits The Technical Stream papers are published as a companion volume under the title Research and Development in Intelligent Systems XX

Object Oriented Software Technologies in Telecommunications Iakovos Venieris, Fabrizio Zizza, Thomas Magedanz, 2000-06-15 Object oriented OO technology is an integral part of computer communications and multimedia service provisioning It plays an important role in providing solutions to problems in the development of telecommunication technology This guide seeks to enable telecommunication engineers to understand the basic principles of OO technology It covers both theoretical and practical aspects of OO Technology which could provide solutions to the problems in future development of telecommunications
