paradigms of analysis that they deem appropriate for this interesting and complex interface in an attempt to demonstrate how the shared interests of these disciplines impact social practices in various communities around the world The ultimate objective of the discussions is to fashion tools for creating a body of new knowledge that supports the emergence of a better society Towards this end the authors have harnessed resources from varied geographical cultural linguistic and religious constituencies without compromising analytical depth In the process they have opened up new areas of sociolinguistic inquiry The volume is thus presented as a highly useful reference resource both for undergraduate and postgraduate scholarship
