Stephen Shore,1998 How does a photograph work In this book internationally acclaimed photographer Stephen Shore brings together more than fifty images by such photographers as Walker Evans Eugne Atget Robert Adams Diane Arbus Frank Gohlke Lee Friedlander Edward Weston Robert Frank William Eggleston and Jan Groover to illustrate a process of looking at and understanding photography He traces the process by which the world in front of the camera is transformed into a photograph and how that photograph in turn is transformed into a mental image A photograph Shore explains can be viewed on several levels First it is a physical object a print On this print is an image an illusion of a window onto the world It is at this level that we read a picture and discover its content a souvenir of an exotic land the face of a lover a wet rock a landscape at night This is the depictive level in which the world is transformed into a photograph through qualities of flatness frame time and focus On a final level is the mental apprehension of the image which joins the focus of lens eye attention and mind Using these levels of seeing Shore reveals how the qualities of a photograph create tension and meaning as the collapsing of depth creates new relationships as lines and shapes in the image play against the frame as focus creates barriers in the depth of an image as the duration of exposure variously transforms the fluid world into a static piece of film As the visual image continues to grow in importance as a medium of global communication the skills and insights conveyed by this book will become increasingly relevant both to those who take photographs and those who view them **Factory Made**

Steven Watson,2003-10-21 Factory Made Warhol and the Sixties is a fascinating look at the avant garde group that came together from 1964 to 1968 as Andy Warhol s Silver Factory a cast that included Lou Reed Nico Edie Sedgwick Gerard Malanga Paul Morrissey Joe Dallesandro Billy Name Candy Darling Baby Jane Holzer Brigid Berlin Ultra Violet and Viva Steven Watson follows their diverse lives from childhood through their Factory years He shows how this ever changing mix of artists and poets musicians and filmmakers drag queens society figures and fashion models all interacted at the Factory to create more than 500 films the Velvet Underground paintings and sculpture and thousands of photographs Between 1961 and 1964 Warhol produced his most iconic art the Flower paintings the Marilyns the Campbell s Soup Can paintings and the Brillo Boxes But it was his films Sleep Kiss Empire The Chelsea Girls and Vinyl that constituted his most prolific output in the mid 1960s and with this book Watson points up the important and little known interaction of the Factory with the New York avant garde film world Watson sets his story in the context of the revolutionary milieu of 1960s New York the opening of Paul

Young's Paraphernalia Truman Capote's Black and White Ball Max's Kansas City and the Beautiful People Party at the Factory among many other events Interspersed throughout are Watson's trademark sociogram more than 130 black and white photographs some never before seen and many sidebars of quotes and slang that help define the Warholian world With Factory Made Watson has focused on a moment that transformed the art and style of a generation

The Synthetic Eye
Fred Ritchin, 2025-03-25 A revelatory glimpse into the future of photography one where the very nature of how images are created is fundamentally transformed by artificial intelligence An invaluable roadmap in a new world The revolution caused by artificial intelligence in terms of what a photograph can and cannot do is profound This book looks at photography's strengths what it has meant for individuals and for society its massive transformations caused by a variety of factors in the digital age and the newer possibilities for image making These include old and new media with an emphasis on synthetic imaging as both a positive and terrifying development In 1840 a year after photography's invention the painter Paul Delaroche exclaimed From now on painting is dead Photography was quicker and cheaper as a representational medium and more realistic its invention also liberated painters to become much more adventurous embracing approaches that included impressionism cubism minimalism and abstract expressionism So too photographers are being challenged today Many have responded with new strategies but more innovation is needed Can photographers be as radically expansive and revolutionary as painters were Can they preserve or even expand the photograph's role in society as a credible witness Can the photographic image morph into forms previously unimagined The Synthetic Eye is about this transformative revolution How can synthetic imagery be utilized to amplify our understanding of ourselves and our worlds Can an alternative photography deepen and expand the medium's previous reach What are the pitfalls How will our senses of the real the possible and the actual be affected
