**Passion for Our Planet** Terry Bagia, 2010-08-12 Of late there has been a very serious interest in alerting the entire world on the volatility of oil dependence and the dangers of climate change This book is an indispensable contribution to the growing debates on the overarching concepts of the danger of perpetual oil dependence climate change and the urgent need for switching to a new habit in energy use the use of alternative renewable energy sources This book is framed around the foundation laid in my first book *Delta in Distress* And it goes further to situate the problems associated with the worlds perpetual unquenchable quest for energy within the global context In my first book there was an elaborate treatment of the concepts of deprivation destitution desperation and distress associated with the exploration and extraction of oil in the contemporary human society as typified by the case of the Niger Delta region in the core Southern Nigeria The description and analysis was clearly articulated with an enduring affinity for possible solutions to these endemic problems of humanity Emphatically in my first book the case of the Niger Delta region of Nigeria which has since become a mosaic of restive communities attracted a critical treatment This was done with very thoughtful and insightful examination There was proper ex ray of the plights of the common community people in that first book *Delta in Distress* These common citizens of the oil communities within the reviewed region are perpetually made to suffer the pangs of untold denials and despair while

enormous oil and gas resources of inestimable economic worth are continually extracted from underneath their land Of course these problems are not limited to only one region They are global in scope and effects Thus the perpetual dependence on oil has drastically placed the security and economic future of the global community on tenterhooks Of late there appears to have been increasing interest in the concepts of oil related crises and conflicts These man made mishaps have claimed many human lives Their causes are directly linked to the mismanagement of the economic proceeds of the oil and gas resources The problems associated with perpetual global dependence on oil surpass the issues of deprivations disaffections conflicts and crises which in a collaborative sense perpetually pose threat to global security More than that is the negative environmental impacts of oil operations in most oil regions This trend has gone down to put the lives of plants animals and human beings on our increasingly ailing planet Earth in serious jeopardy Obviously energy is at the very center of our daily lives Everybody uses energy from the time of rising from bed until the time of going back to sleep In every nation of the world there is a persistent drive to continually advance in technology This growing technological break through is what makes modern live easier and more convenient So the more technology the human folks use every blessed day the greater our need for energy Looking at the compelling nature of this energy problem and its interrelationship with almost every facet of the lives of virtually everybody in the society every attempt to face the fearful odds associated with this problem implies a different and well defined approach to the issue In the first place America like any of the other developed nations of the world can no longer afford to risk treading the path of isolationism neither can any of the other nations of the world afford to bask in the luxury of self contentment or toughness under the present dispensation To say the least President Obama and his team are truly driven by the realization that the United States must telegraph a new message of respect collaboration and mutuality in the quest to lead the way out of the present pace of uncertainty that defines the global energy future This new drive and President Obamas passion for our planets overall serenity prosperity and progress are the themes which this must read volume drastically and critically examines This book is truly a must read *Building Tomorrow's Talent* Spahr Doris Sims, Spahr Matthew Gay, 2007-02 **The Mad Professor of Babeldu** Adamu Kyuka Usman Lilymjok, 2013-08-30 The Mad Professor of Babeldu is a work of fiction with an eccentric professor as its major character Sitting alone in his farmhouse Professor Philjez in a profound and sometimes comic manner talks on a variety of issues from politics to religion economics culture science and a myriad of other issues This book no doubt will resonate with many readers because of its unusual character and profound ideas Bizarre comical shocking profound and perhaps blasphemous are all adjectives aptly descriptive of The Mad Professor of Babeldu Driven by Professor Philjez its eccentric major character this book despairs and inspires saddens and excites frightens and soothes sobers and intoxicates a reader It is a mixed grille It is a jolly hearty party of ideas that cannot fail to go away with gold medals in any Olympic contest of ideas *Tomorrow's Americans* Aberdeen Orlando Bowden, Mrs. Ida Clyde Gallagher Clarke, Ida Clyde Clarke, 1930 *Why Volunteers Get All The Breaks* Eric B.

Barnes,2009-06 There is so much advice available on how to be the ideal job prospect There are so many advertisements on the latest hot new careers Between all this is the long frustrating cycle of unemployment for which there is no end in sight And as if it couldn t get worse there are countless get rich quick schemers who are interested not in your success but their own personal profits But there is hope My book aims to encourage you to consider volunteering as a way to get your foot in the door as a way to get your products and services in front of the people instead of going through the middlemen This is not volunteering as a way to be a noble individual This is volunteering as a way to take control of your own destiny Stop begging employers to give you a job Stop begging people to give your business venture a chance Get out there let someone try you out by offering a free sample and then get paid from quality products and services I know you have to offer Forbes Bertie Charles Forbes,1951 This business magazine covers domestic and international business topics Special issues include Annual Report on American Industry Forbes 500 Stock Bargains and Special Report on Multinationals **Today and tomorrow** Henry Ford,1926 *Whitaker's Five-year Cumulative Book List* ,1968 The World Tomorrow Norman Thomas,John Nevin Sayre,Devere Allen,Kirby Page,1923 The Writer's Digest ,1927 **Tomorrow's Executives** Melbourne (Vic.).
