Tools 5 Technology Of Object Oriented Languages And Systems:

Technology of Object-oriented Languages and Systems, TOOLS 5 Bertrand Meyer, 1991 This work encapsulates the papers presented at a Tools 5 conference held in the University of California which covered object oriented databases reusable objects a comparison of object oriented languages object oriented user interfaces and object oriented project management

Technology of Object-oriented Languages and Systems : TOOLS 30 Donald G. Firesmith, 1999 The August 1999 conference concentrated on the delivery of high quality software on schedule and within budget offering practical experience from both industry and academia The 37 technical papers provide insights from lessons learned on real projects covering such topics as databases object ori

ZUM '98: The Z Formal Specification Notation Jonathan P. Bowen, Andreas Fett, Michael G. Hinchey, 1998-09-16 1 In a number of recent presentations most notably at FME 96 one of the foremost scientists in the field of formal methods C A R Hoare has highlighted the fact that formal methods are not the only technique for producing reliable software This seems to have caused some controversy not least amongst formal methods practitioners How can one of the founding fathers of formal methods seemingly denounce the field of research after over a quarter of a century of support This is a question that has been posed recently by some formal methods skeptics However Prof Hoare has not abandoned formal methods He is reiterating 2 albeit more radically his 1987 view that more than one tool and notation will be required in the practical industrial development of large scale complex computer systems and not all of these tools and notations will be or even need be formal in nature Formal methods are not a solution but rather one of a selection of techniques that have proven to be useful in the development of reliable complex systems and to result in hardware and software systems that can be produced on time and within a budget while satisfying the stated requirements After almost three decades the time has come to view formal methods in the context of overall industrial scale system development and their relationship to other techniques and methods We should no longer consider the issue of whether we are pro formal or anti formal but rather the degree of formality if any that we need to support in system development This is a goal of ZUM 98 the 11th International Conference of Z Users held for the first time within continental Europe in the city of Berlin Germany

Formal Methods - Pacific 97 Australasian Refinement Workshop, New Zealand Formal Program Development Colloquium, 1997-12 Formal Methods Pacific 97 is an umbrella conference incorporating the 6th Australasian Refinement Workshop and the 3rd New Zealand Formal Program Development Colloquium The conference provided a forum for discussion of current research on mathematically based techniques for design and development of computer systems especially formal and or rigorous methods for developing executable programs from abstract specifications tool support for formal software development and practical experience with formal methods Topics also include software specification and verification hardware specification and verification and specification and development of real time and concurrent systems The refereed papers included in these proceedings present significant contributions to current research in formal software

development within Australasia along with several contributions from other parts of the world The conference also included informal presentations describing work in progress abstracts only for these are included **Tools 11** Bertrand Meyer,Raimund Ege, Madhu Singh,1993 *Essays on Object-oriented Software Engineering* Edward V.
