Uncertain Futures:

Uncertain Futures Jens Beckert, Richard Bronk, 2018-07-05 *Uncertain Futures* considers how economic actors visualize the future and decide how to act in conditions of radical uncertainty. It starts from the premise that dynamic capitalist economies are characterized by relentless innovation and novelty and hence exhibit an indeterminacy that cannot be reduced to measurable risk. The organizing question then becomes how economic actors form expectations and make decisions despite the uncertainty they face. This edited volume lays the foundations for a new model of economic reasoning by showing how in conditions of uncertainty economic actors combine calculation with imaginaries and narratives to form fictional expectations that coordinate action and provide the confidence to act. It draws on groundbreaking research in economic sociology, economics, anthropology, and psychology to present theoretically grounded empirical case studies. These demonstrate how grand narratives, central bank forward guidance, economic forecasts, finance models, business plans, visions of technological futures, and new era stories influence behaviour and become instruments of power in markets and societies. The market impact of shared calculative devices, social narratives, and contingent imaginaries underlines the rationale for a new form of narrative economics.

Uncertain Futures Alexander F. Gazmararian, Dustin Tingley, 2023-07-20 *Using stories from the front lines of the energy transition*, this book shows how to unlock the climate impasse.

Young People and Uncertain Futures? James Goring, Peter Kelly, 2025-08-29 *Drawing on Foucault's genealogical ethos and his work on power knowledge*, subjects this book analyses the ways in which neo-liberal education apparatuses in Australia and other high income economies frame the problem of young people and uncertain futures. The book critically examines the character of the presents and futures of education, training, and work, and of the planet that have been produced in globalising neo-liberal capitalism during the last four decades, and which see in the development of young people's enterprise and aspiration the solutions to multiple crises and uncertainties. It analyses how and why young people's behaviours and dispositions have been made knowable in these ways, and the limits and possibilities that they produce for understanding what young people must be and become. The book draws on post-humanist, feminist studies of techno-science and futures studies to explore the promise of more socially just and sustainable futures for young people. A thought-provoking study for scholars and students of the sociology of education and of youth and society, it will be invaluable for policymakers, governments, NGOs, educators, and undergraduate and postgraduate students interested in young people and the crises of capitalism, earth systems, and the biosphere.

Uncertain Futures Edmund V. Mech, Hewitt B. Clark, 2003 *Discusses the plight of youth who have aged out of the system. It provides meaningful practical solutions for teaching youth to support themselves before they are forced out of care and details programs that assist youth in becoming self-supporting once they do leave the foster care system.*

Uncertain Futures BECKERT & BRONK., *Uncertain Futures* considers how economists visualize the future and decide how to act in conditions of uncertainty.
