Hidden Conversations David Livingstone Smith, 2018-05-08 Hidden Conversations introduces Robert Langs radical reinterpretation of psychoanalysis by presenting and expanding his ideas in new and accessible ways It is the first clear account of the theories underlying Langs approach placing them within the context of the history of psychoanalysis and showing for example that Freud nearly discovered the communicative approach in the late 1890s and that in the 1930s Ferenczi also anticipated the method David Livingstone Smith illustrates this communicative approach with a wealth of practical detail and clinical examples including verbatim accounts of communicative psychoanalytical sessions with a commentary on the unconscious processes underlying them

Unconscious Communication in Everyday Life Robert Langs, 1983 **Workbooks for Psychotherapists** Robert Langs, 1985 Psychodynamic Counselling in Action Michael Jacobs, 1999-09-13 The bestselling First Edition of *Psychodynamic Counselling in Action* has become widely regarded as the most accessible introduction to this complex subject and essential reading for trainees and practitioners working within different orientations who want to develop knowledge and skills in this area. Revised and updated to take account of current practice and now extensively referenced the Second Edition describes the psychodynamic counselling process from the first meeting to termination. Michael Jacobs clearly sets out the main aspects of the approach and using two case studies, a man and a woman, he shows how these can be applied creatively and effectively within counselling practice. Transactional Analysis Journal, 2007 Cumulated Index to the Books, 1999 Teaching Atlas of Nuclear Medicine Kevin Donohoe, Annick Van den Abbeele, 2000-04-15 Each volume in Thieme's new Teaching Atlas series features a wide range of challenging cases in radiology and is ideal for both self-assessment and review. All cases stress the real-life presentation of a specific clinical problem beginning with high-quality radiographs and followed by patient history, radiographic findings, differential diagnosis, discussion and suggestions for further reading. Highlighted Pearls, Pitfalls and Controversial Issues round out the presentation of each case and provide the reader with hundreds of useful hints and recommendations. A must for residents rotating in sub-specialties or studying for board examinations, the Teaching Atlas series is also a useful review for experienced practitioners. In the TEACHING ATLAS OF NUCLEAR MEDICINE you will find comprehensive coverage of the entire field of nuclear medicine through a series of clearly presented cases. Following the board exam format, the cases are presented as unknowns with an image and brief clinical description; you are then asked to arrive at your own differential diagnosis. Complete with tips, pearls, pitfalls and a brief discussion of each case, this is the ideal book for self-testing and maximizing your study time. **Person-centred Practices** Mark Jukes, John Aldridge, 2006 This work focuses on the way in which practitioners within learning disability explore a range of therapeutic interventions that help to assist in our understandings of how people with a learning disability interpret their world, feelings and extent of problems as they interact with people and the environment. **Invitation to Psychodynamic Psychology** Alessandra Lemma, Alessandra Lemma-Wright, 1995 This work introduces the basic assumptions and concepts of psychodynamic psychology. Since the term psychodynamic can be applied to a number of diverse schools of thought, the book stresses the commonalities across the various schools rather than exposing in detail the differences between the theories. No prior knowledge of psychoanalytic ideas is assumed in the book. By asking and answering a number of commonly posed questions, the author aims to introduce psychoanalytic ideas by showing their relevance to understanding ourselves and our interactions with others. The book's most important message is that

psychoanalytic ideas are accessible and enlightening though it also discusses some of the limitations and problems of the theory and its applications *Gregory Bateson* David Lipset,1982 Romantic Dreams Patricia Maybruck,1991 *Social Casework* ,1961 Subject Guide to Books in Print ,1991 **Religion in Life** ,1952 Includes section Book reviews
