## **Xavier's Promise:**

Rights and Right-Holding Matthew H. Kramer, 2024-07-13 Building on many years of scholarship Matthew H Kramer sets out his definitive philosophical investigation of rights and rights holding with this monograph as he sometimes revisits and modifies his previous positions Beginning with the analytical schema propounded by the American legal theorist Wesley Hohfeld the book provides a defence of the proposition that every claim right with a certain content is correlative to at least one duty with the same content and that every duty with a certain content is correlative to at least one claim right with the same content The volume then addresses the longstanding debates over the nature of right holding with a sustained defense of the Interest Theory and with some innovative critiques of the Will Theory Finally it considers the ethical and analytical questions involved in determining who can hold claim rights at all It argues that the beings capable of holding claim rights include not only human adults of sound mind but also all other living human beings many dead people and all future generations of people along with most non human animals Addressing some major topics within moral legal and political philosophy Rights and Right Holding A Philosophical Investigation will be a key work for philosophers and academic lawyers alike

**The Xavier**, 1904 New Essays on the Nature of Rights Mark McBride, 2017-08-24 This original collection of jurisprudential essays furthers our understanding of the nature of rights In Part 1 Halpin considers the value of Hohfeldian neutrality when theorising about law in general and legal rights in particular and Kurki focuses on Hohfeld's operative notion of power In Part 2 Kramer rebuts Wenar's objections to his Interest Theory of rights and May provides a comparative defence of the Interest Theory against Wenar's Kind Desire theory of claim rights Penner then pursues legal doctrine focusing on whether judges hold the powers of their office as rights an issue over which Wenar and Kramer have clashed Sreenivasan utilising a novel test case involving pure public goods argues that the third party beneficiary objection to the Interest Theory is fatal McBride builds on Sreenivasan's Hybrid Theory of claim rights to construct his new Tracking Theory of rights Cruft then argues that the best extant versions of the Interest and Will Theories of rights cannot avoid a form of circularity and Van Duffel argues that meeting four adequacy constraints which he proposes counts in favour of any theory of rights In Part 3 Andersson proposes a tie breaking procedure for rights conflicts in the applied realm of politics and Steiner concludes by alleging that Kant's principle of right a standard of corrective justice has distributive implications A fine collection of cutting edge essays on the most important normative concept of modernity Professor Leif Wenar King's College London This important collection proceeds much beyond the famous 1998 A Debate Over Rights which sets the stage for the debates concerning rights since then It explores three aspects of rights First it re-examines the Hohfeldian classification and highlights its importance and relevance Second it investigates and develops the debates between the interest and the will theory It includes essays by the main established proponents of these two positions as well as essays by newcomers to this field The different essays in this part address each other in ways which sharpen and clarify the disagreements and provide

new original arguments for the contending views Last it provides a new perspective on the debates concerning conflicts of rights and the ways to overcome them This collection will no doubt dominate the future conceptual discussions concerning the nature of rights and their role in political theory Professor Alon Harel The Hebrew University of Jerusalem
