Sofies Verden:

Beyond Babar Sandra L. Beckett, Maria Nikolajeva, 2006-08-19 All too often attention is paid only to those children's novels that were written in English with non-English language works being passed over and neglected. *Beyond Babar: The European Tradition in Children's Literature* examines eleven of the most celebrated European children's novels in substantial critical essays written by well-known international scholars. This approach provides a comprehensive discussion of the selected works from a variety of theoretical perspectives. Each essay offers a critical introduction to the text that can serve as a point of departure for literary scholars, professors of children's literature, primary and secondary school teachers, and librarians who are interested in texts that cross languages and cultures. *Beyond Babar* is especially meant to assist instructors of children's literature who would like to use these texts in the classroom in order to begin to redress the English language dominance of many children's literature courses. This volume will also be of interest to the general public as its ultimate aim is to bring to the attention of all English-speaking readers the literature from other parts of the world in this case from Europe. *Beyond Babar* helps to facilitate the border crossings of these European masterpieces of children's literature into the English-speaking world. *The Norseman*, 2003

Information Structure in a Cross-Linguistic Perspective, 2016-08-29 The present volume draws together contributions from a number of scholars with an interest in empirical cross-linguistic description. Most of the papers were first presented at the symposium *Information Structure in a Cross-Linguistic Perspective* held in Oslo in November-December 2000. The descriptions are functionally oriented and their common focus is how information structure in a broad sense can be compared across languages. Information structure has been approached in a variety of ways by the authors so as to give a broad picture of this fundamental principle of text production involving the way in which a speaker/writer chooses to present a message in terms of given/new information, focus, cohesion, and point of view. Central to much of the research is the problem of establishing criteria for isolating linguistic constraints on language use from cultural/linguistic conventions in text production. The linguistic comparison includes English, German, and/or one of the Scandinavian languages, with sidelights to other languages. Most of the papers are text or corpus based, and the ongoing work on parallel corpora in Scandinavia is reflected in several contributions. *Translation in Context*, Andrew Chesterman, Natividad Gallardo San Salvador, Yves Gambier, 2000-01-01 This title is a collection of contributions illustrating research interests and achievements in translation studies at the turn of the 21st century. The contributions show how the context of translation has expanded to cover documentation techniques, cultural and psychological factors, computer tools, ideological issues, media translation, and methodologies. A total of 32 papers deal with aspects such as conceptual analysis in translation studies, situational, sociological, and political factors, and psychological and cognitive aspects of translation.
