Trends in Fish Processing Technologies Daniela Borda, Anca I. Nicolau, Peter Raspor, 2017-10-30 The high market demand based on consumers trust in fish as a healthy and nutritious food resource made fish processing a very dynamic industry spurring many innovations in processing and packaging methods Trends in Fish Processing Technologies not only reflects what is currently new in fish processing but

also points out where things are heading in this area This book provides an overview of the modern technologies employed by the industry It details the advances in fish processing including high pressure processing HPP pulsed electric field PEF treatment and minimally heat processing combined with microwave MW and radio frequency RF It provides references to food safety management systems and food safety quality indicators for processed fish in order to achieve an adequate level of protection Quality aspects and molecular methods for the assessment of fish and fish products integrity are introduced Fish products reformulation trends based on sustainability principles that tackles the reduction of salt content and the use of natural antimicrobials are presented Innovative packaging solutions for fish products are explored detailing intelligent packaging with freshness and time temperature indicators applications of modified packaging atmosphere antimicrobial bio nanocomposite packaging materials and biodegradable edible films used as primary fish packaging In addition to covering the current advancements in fish processing the book discusses fraud adulteration fair trade practices traceability and the need for added value clean and sustainable processing in the fish chain

Handbook of Food Science, Technology, and Engineering Yiu H. Hui, 2006 *Food Hydrocolloids* K. Nishinari, E. Doi, 2012-12-06 It is now well recognised that the texture of foods is an important factor when consumers select particular foods Food hydrocolloids have been widely used for controlling in various food products their viscoelasticity emulsification gelation dispersion thickening and many other functions An international journal FOOD HYDROCOLLOIDS launched in 1986 has published a number of stimulating papers and established an active forum for promoting the interaction between academics and industrialists and for combining basic scientific research with industrial development Although there have been various research groups in many food processing areas in Japan such as fish paste kamaboko surimi soybean curd tofu agar jelly dessert kuzu starch jelly kimizu Japanese style mayonnaise their activities have been conducted in isolation of one another The interaction between the various research groups operating in the various sectors has been weak Symposia on food hydrocolloids have been organised on several occasions in Japan since 1985 Professor Glyn O Phillips the Chief Executive Editor of FOOD HYDROCOLLOIDS suggested to us that we should organise an international conference on food hydrocolloids We discussed it on many occasions and eventually decided to organise such a meeting and extended the scope to include recent development in proteinaceous hydrocolloids and their nutritional aspects in addition to polysaccharides and emulsions

Fish Processing George M. Hall, 2011-06-13 This book seeks to address the challenges facing the international seafood industry via a two pronged approach by offering the latest information on established technologies and introducing new ideas and technologies An introductory chapter sets the tone for the book by presenting the background against which fish processing will exist in the near future Chapter two looks at the environmental and sustainability issues relating to conventional fish processing including processing efficiency and better use of the outputs currently considered wastes The impact of mechanisation and computerisation on environmental sustainability is also addressed Subsequent chapters examine the latest developments in

established fish processing technologies such as canning curing freezing and chilling with an emphasis on the environmental aspects of packaging and the process itself In addition quality and processing parameters for specific species including new species are described The second part of the book gives authors the opportunity to introduce the potential technologies and applications of the future to a wider audience These include fermented products and their acceptance by a wider audience the utilisation of fish processing by products as aquaculture feeds and the use of by products for bioactive compounds in biomedical nutraceutical cosmetic and other applications **Encyclopedia of Food Science and Technology** ,1991
