# The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed to the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the people you want to work for. This includes understanding their work style, their preferred work environment, and their preferred work schedule.

The way to build a hybrid work model is to start with the people and work backwards. This means understanding the needs and expectations of the people you want to work for, and then designing a hybrid work model that meets those needs and expectations.

How do you know if you've got it right? A successful hybrid workplace model will have high employee engagement, high productivity, and high retention. It will also be flexible and adaptable to change.
