**Temporal, Spatial, and Spatio-Temporal Data Mining** John F. Roddick, Kathleen Hornsby, 2003-06-29 This volume contains updated versions of the ten papers presented at the First International Workshop on Temporal Spatial and Spatio Temporal Data Mining TSDM 2000 held in conjunction with the 4th European Conference on Principles and Practice of Knowledge Discovery in Databases PKDD 2000 in Lyons France in September 2000. The aim of the workshop was to bring together experts in the analysis of temporal and spatial data mining and knowledge discovery in temporal spatial or spatio temporal database systems, as well as knowledge engineers and domain experts from allied disciplines. The workshop focused on research and practice of knowledge discovery from datasets containing explicit or implicit temporal spatial or spatio temporal information. The ten original papers in this volume represent those accepted by peer review following an international call for papers. All papers submitted were refereed by an international team of data mining researchers listed below. We would like to thank the team for their expert and useful help with this process. Following the workshop, authors were invited to amend their papers to enable the feedback received from the conference to be included in the final papers appearing in this volume. A workshop report was compiled by Kathleen Hornsby, which also discusses the panel session that was held.
