Temporalization Of Time:

The Temporalization of Time Mike Sandbothe, 2001-10-31 The subject of time is currently experiencing a revival in the most diverse areas of academic discourse Contemporary time theory attempts to relate theoretical time concepts both to one another and to everyday experience of time This book deals with the philosopher Martin Heidegger and the chemist physicist Ilya Prigogine Nobel Prize for Chemistry 1977 two prominent advocates of pioneering time concepts in the 20th century The author not only provides a transdisciplinary introduction to modern debate on the problem of time but suggests how the basic tendencies in this debate might be pragmatically interlinked with each other

Unphenomenal Shakespeare Julián Jiménez Heffernan, 2023-01-16 In the aftermath of New Historicism and Cultural Materialism the field of Shakespeare Studies has been increasingly overrun by post theoretical phenomenological claims Many of the critical tendencies that hold the field today post humanism speculative realism ecocriticism historical phenomenology new materialism performance studies animal studies affect studies are consciously or unwittingly informed by phenomenological assumptions This book aims at uncovering and examining these claims not only to assess their philosophical congruency but also to determine their hermeneutic relevance when applied to Shakespeare More specifically Unphenomenal Shakespeare deploys resources of speculative critique to resist the moralistic and aestheticist phenomenalization of the Shakespeare playtexts across a variety of schools and scholars a tendency best epitomized in Bruce Smith's Phenomenal Shakespeare 2010

Husserl's Account of Our Consciousness of Time James R. Mensch, 2010 Having asked What then is time Augustine admitted I know well enough what it is provided that nobody asks me but if I am asked what it is and try to explain I am baffled We all have a sense of time but the description and explanation of it remain remarkably elusive Through a series of detailed descriptions Husserl attempted to clarify this sense of time This book traces the development of his account of our temporal self awareness starting with his early 1905 1909 lectures on time consciousness and proceeding through the 1917 18 Bernau Manuscripts the Analyses of Passive Syntheses of the 1920s and ending with the C B and E manuscripts on time and instincts of the 1930s Although it covers all the stages of Husserl's account of temporality the book is nonetheless systematic in its approach It is organized about a number of basic topics in the theory of time and presents and critically appraises Husserl's positions on the issues pertaining to each
