of tennis is not a mere measuring of the brute strength and speed of two players but rather a measuring of heads You get points and win the match by outwitting your opponent The speed and the strength let you take advantage of the openings which you have thought out Put a hard ball to the place where your adversary is not that is tennis And I think this principle is best worked out in the game of singles Therefore I like singles doubles are chummy and they are not nearly such hard work as singles but I hold the joy of purely individual combat so highly that I consider singles as the only real game of tennis It is in singles that one can work out plans of attack can study the weaknesses of the opponent can scheme to outwit and then can execute the plans without the factor of a partner or an opponent s partner It is wit versus wit strength and speed versus strength and speed You are equally responsible for your errors and your aces Singles is the self reliant game which brings out all that is in you and I take it to be tennis Doubles has none of these fascinating individual qualities I suppose that games and even matches may be won by playing for your opponent to make errors I prefer the positive game in which you do the scoring instead of trusting to errors from the other side of the net One can never go far with the negative game you cannot always take for granted that the opponent will net or out when goaded to frenzy by your inevitable even easy returns It is a poor sort of a style to fall into I always take the game to my opponent Attack attack attack The original attack is with the server the server has the advantage of placing the first stroke This is an Pierre's Book Pierre Etchebaster,1971

Tennis Science Machar Reid,Bruce Elliott,Miguel Crespo,2015-10-26 If you have watched a Grand Slam tennis tournament in the past decade you are probably aware that the game is dominated by just a few international powerhouses At the conclusion of each tournament it is likely that you will see Serena Williams atop the women s podium and a member of the Big Four Roger Federer Rafael Nadal Novak Djokovic and Andy Murray hoisting the trophy for the men And while there is not a lot of variety in the outcome of these matches the game of tennis itself has changed drastically over the decades as developments in technology and conditioning regimens among other factors have altered the style of play Underpinning many of these developments is science and this book explains the scientific wonders that take the ball from racket to racket and back again Each chapter explores a different facet of the game learning technique game analysis the mental edge physical development nutrition for performance and recovery staying healthy and equipment and is organized around a series of questions How do we learn the ins and outs of hitting the ball in and not out What are the main technological developments and software programs that can be used to assist in performance and notational analysis in tennis What role does sports psychology play in developing a tennis player What is the role of fluid replacement for the recreational junior and professional player What rule changes have been made with respect to the racket ball and ball court interaction to maintain the integrity of the game in the face of technological change Each question is examined with the aid of explanatory diagrams and illustrations and the book can be used to search for particular topics or read straight through for a comprehensive overview of how player and equipment work together Whether you prefer the grass courts of Wimbledon the clay courts of
