Keyboard, Graphic and Handwriting Skills Dorothy E. Penso, 1990 The practising paediatrician struggles to combat the effects of acute illness and disease in babies and older children The pattern of hospital admissions has changed dramatically since I first qualified over 25 years ago Neonatology is a relatively new branch of paediatrics and achievements in neonatal intensive care have been exciting and little short of astonishing However like the poor children with chronic disabilities are always with us Sadly modern mainstream medical progressive thinkers regard as much less prestigious the work done in the field of handicap Thanks to inspirational paediatricians like Ronnie McKeith Trevor Wright and Ray Remboldt great teachers all and wise counsellors to learners like myself the needs of children with developmental disabilities have been highlighted Moreover the importance of a holistic approach to these children their families and their teachers has been emphasized In the Child Development Centre at York a multidisciplinary team attempts to define as accurately as possible the nature and severity of the problems facing a child but the child's predicament and how to solve or alleviate it remains the key issue A full team assessment which does not lead to

any practical help for the child and his family is merely an academic exercise and a disgrace to the many different professions involved
