PROJECT MANAGEMENT FRAMEWORK

Initiation	Planning	Execution	Performance Control	Closure
Project managers work with other concerned stakeholders to evaluate and determine the value and feasibility of the project.	Scope, schedule, budget, resources, and risks are discussed in this phase to develop a perfect project plan.	Project execution follows the developed plan in this stage to keep the development process smoother.	The project execution process gets evaluated in this phase by means of KPIs like project objectives, quality deliverables, overall project performance, etc.	A final closure meeting is also held to discuss the overall experience and to close all project accounts.

and other people competence models in the area of general management
