## **Sun And Planetary System:**

The Sun: Ruler, Fire, Light, and Life of the Planetary System Richard Anthony Proctor,1872      **From the sun's energy source to the formation of the solar system** Dan Bar-Zohar,2006-12-04 The latest observation of hundreds of exoplanets and the discovery of supermassive black hole at the center of many galaxies set the foundation for the theory presented in this book The theory suggest that the sun and stars energy source is not from fusion but instead from magnetic fields spreads in the galaxy by the supermassive black hole at the center of every galaxy This idea changes every aspect of astronomy and cosmology The big bang is no longer necessary to explain the source of the mass in the universe and the expansion of the universe According to this theory the matter in the universe is created in the cores of stars by conversion of energy to mass The expansion of the universe is induced by the rapid formation of new galaxies Stars grow slowly and gradually over tens of billion of years by conversion of energy to mass The gradual growth of stars and the planet search programs that found hundreds of nearby planets indicate that stars are born from planets This invalidates the solar nebula hypothesis as the source of the stars and the solar system Stars fluctuate from a main sequence state to a red giant state They stay in the main sequence when they receive strong magnetic fields and they turn into a red giant when the magnetic fields are weakened The sun also fluctuated from a main sequence to a red giant When the sun was a red giant it had strong solar wind that supplied the material to created the planets The solar system contains hard evidence that the sun was a red giant those are short lived isotopes and chondrules The fact that there is hard evidenced to a red giant sun confirm this theory Highlights of this theory include the following 1 The sun energy source is from magnetic fields from the galactic center 2 The heat induced by the magnetic fields leads to high energy collision between particle in the sun core that creates new particle and increase the sun mass 3 All the stars in the galaxy create new mass so the total mass and the size of the galaxy is increasing 4 The stars in the galaxy eject dust that freefall to the galactic center supermassive black hole Thorough the dynamo effect the gravitational potential energy of the debris and dust is converted to magnetic fields 5 As the galaxy mass and size increase globular clusters are detached form the main galaxy to create new galaxies 6 Galaxies spawn new galaxies and the total number of galaxies in the universe increase 7 The universe expands and accelerates from the increase in the number of the galaxies 8 The Big Bang cosmological model is replaced by a new cosmological model that resembles the steady state theory 9 Stars grow gradually from conversion of energy to mass 10 Stars are born from planets they first grow by accretion and then by conversion of energy to mass 11 Stars fluctuate from main sequence to a red giant When the magnetic fields are strong the star is in the main sequence when the magnetic fields are weakened the star turn to a red giant 12 The sun was a red giant 4 6 billions years ago 13 The planets were created from the strong solar wind of the red giant sun      Our Solar System Frederick M. the years and also to several generations of students who have helped me develop my ideas on biological theory and on  
Darwin My wife has as usual been more than helpful in particular she typed a good portion of the manuscript while I was on  
leave a few years ago more now than I like to remember My parents were both looking forward to holding a final copy of this  
book I only regret that my mother did not live long enough to see its completion I must also thank the publishers and their  
staff They have been re markably patient about meeting deadlines promises were repeatedly made and then owing to family  
situations had to be broken and for this I am considerably in their debt I would further like to thank the following authors and

### Sun And Planetary System Introduction

In the digital age, access to information has become easier than ever before. The ability to download Sun And Planetary System has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Sun And Planetary System has opened up a world of possibilities. Downloading Sun And Planetary System provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Sun And Planetary System has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Sun And Planetary System. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Sun And Planetary System. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Sun And Planetary System, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Sun And Planetary System has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
