

# Ready, Set, Throw!

## MASTERING THE POTTERY WHEEL IN 10 STEPS

Throwing a vessel on the pottery wheel may look deceptively easy, but if you ask any master potter, it's a test of patience and practice. Whether you prefer a lathe wheel or an electrical one, these ten steps will help you become a throwing master!

### TOOLS OF THE TRADE

Whether you're throwing on the wheel or hand-building your work, these tools are essential.

### CHOOSING YOUR CLAY

**Earthenware**  
Earthenware is the most common pottery material, and it's the easiest to work with. It's made from natural clays and fired at a lower temperature than stoneware or porcelain.

**Stoneware**  
Stoneware is a more durable pottery material, and it's made from natural clays and fired at a higher temperature than earthenware. It's also more resistant to water damage.

**Porcelain**  
Porcelain is a very hard and durable pottery material, and it's made from natural clays and fired at a very high temperature. It's also more resistant to water damage.

### SETTING UP AND THE SEQUENCE

You can use a centering tool, but a rib will work just as well.</p> | <p><b>3</b><br/>If you're using a wheel with a motor, make sure it's turned on and the speed is set to the correct level. If you're using a hand wheel, make sure it's turned on and the speed is set to the correct level.</p> | <p><b>4</b><br/>When you're ready to start, hold the clay in the center of the wheel with your hands. Use your fingers to hold the clay in place.</p> | <p><b>5</b><br/>Use your hands to shape the clay into a bowl. Start with a wide opening and narrow it as you go.</p>  |
