**Aquaculture Magazine**, 1991      **Revolution at the Margins** Frederick M. Hess, 2004-05-13 For more than a decade school choice has been a flashpoint in debates about our nation's schooling Perhaps the most commonly advanced argument for school choice is the notion that markets will force public schools to improve particularly in those urban areas where improvement has proved so elusive However the question of how public schools respond to market conditions has received

surprisingly little attention Revolution at the Margins examines the impact of school vouchers and charter schooling on three urban school districts explores the causes of the behavior observed and explains how the structure of competition is likely to shape the way it affects the future of public education The book draws on research conducted in three school districts at the center of the school choice debate during the 1990s Milwaukee Wisconsin Cleveland Ohio and Edgewood Texas Case studies examine each of these three districts from the inception of their local school choice program through the conclusion of the 1999 school year The three school districts studied did not respond to competition by emphasizing productivity or efficiency Instead under pressure to provide some evidence of response administrators tended to expand public relations efforts and to chip holes in the rules regulations and procedures that regulate public sector organizations Inefficient practices were not rooted out but some rules and procedures that protect employees and vocal constituencies were relaxed Public school systems are driven by political logic according to Hess and their incentives lead them to respond generally through symbolic and metaphorical gestures Choice induced changes in public school systems will be shaped by public governance the market context in which they operate and their organizational characteristics Revolution at the Margins encourages scholars and policymakers to think more carefully about the costs and benefits of educational competi
