Green Building Guidance Karthik Karuppu, NVICO, 2019-02-07 Conventional buildings don t have sustainability because of the approach of designing and the construction method The total energy consumption calculates for all buildings account for up to 40% in India and commercial and residential real estate combined will account for more than 2000 TWH of energy consumption by 2030 India has an expected energy deficit of around 12% which is one of the major hurdles for the government This will result in a further increase in electrification in all areas Green buildings utilize fewer resources and are healthier to live in They offer significant operational cost savings compared with conventional buildings In effect green homes can expect a 14 percent savings in operational costs over five year savings for new green buildings and 13 percent savings in operational costs over five years for green retrofit and renovation projects Building owners also report that green buildings whether new or renovated give a 7 percent increase in asset value over conventional buildings

Journal of Green Building, 2007

The Complete Guide to Green Building & Remodeling Your Home Martha Maeda, 2011 In today s economy and

socially conscious environment regarding the environment many people cannot afford not to start considering ways they can build or remodel their home to ensure it is green With scientific sources such as the UN council on global warming making statements about the degradation of ice flow and environmental conditions by 2050 and the likelihood that crude oil sources will be used up within the next fifty years it is especially necessary for young families to consider the implications of re examining their homes and living situations to be more green This book will guide you and your family through the process of learning more about and implementing the necessary changes and perspectives needed to change your home or build a new home that is environmentally conscious and prepared for the changing economic and environmental climate in the coming decades You will learn why people have started to build green and how it can be done in today s regulatory and cost conditions quickly and inexpensively You will learn how to remodel with green in mind and how to start working with building professionals that can provide the necessary materials plans and paperwork you need to proceed You will learn which materials are best for green building by lifespan and how to choose between various green materials You will learn how to not only use green materials but to make sure the construction process is green as well You will learn the basics of framing your building natural building methods the energy systems you might use and the heating cooling options at your disposal Construction and environmental experts have been interviewed and their expertise is included in this book to help you learn everything you need to accomplish the above as well as to know what kinds of water and waste systems are best how to site plan and landscape your home and what the most common myths about green building are You will learn ten things you can do on any building project to keep it green and any materials you should always have on hand for anything you do around the house Regardless of whether you are just looking to remodel to make your house greener or are building a new home this book will give you everything you need to stay green and respect the environment with your home
