Saving a World Treasure: Protecting Florence from Flooding Galloway, Gerald, Seminara, Giovanni, Blöschl, Günter, Garcia, Marcelo, Montanari, Alberto, Solari, Luca, 2017-10-31 The Committee Firenze 2016 on the occasion of the 50th anniversary of the tragic 1966 flood invited six engineers and scientists to form an International Technical Scientific Committee ITSC to assess the current status of flood protection for the city of Florence and identify steps to reduce the risk of flooding facing the city In this final Report ITSC concludes that Florence remains at risk to significant flooding and this risk grows each day It is not a question of whether a flood of the magnitude of 1966 or greater will occur but when In fact the level of protection that exists in Florence now is not on a level appropriate to the citizens and treasures that rest within the city If under current conditions a 1966 like flood occurred the consequences to human lives treasures properties and community infrastructure could be much more catastrophic than they were in 1966
