**World Population: Past, Present, & Future** Julio A Gonzalo, Manuel Alfonseca, Felix-fernando Munoz Perez, 2016-06-09 World Population Past Present Future uses a multidisciplinary approach to investigate in depth on important aspects of the evolution of world population not well addressed previously The authors from the Universidad Autonoma Madrid Spain professors Julio A Gonzalo Manuel Alfonseca and Felix Fernando Mu oz point out that the recent pronounced growth in world population accompanied by an even more pronounced growth in agricultural production was due mainly to the increase of life expectancy and not to the nonexistent growth in fertility rate Using a rate equations approach for the first time they describe population trends and forecast the possibility of steps up or down in population rather than the exponential growth predicted by UN demographers around 1985 and thereafter This book provides a new perspective that our planet is not overpopulated and could in fact house a considerably larger population

eventually attain the very low levels of births now observed in the industrialized world Other keys to accurate projections predictions of lengthening life span and of the impact of international migration on specific countries are also explored in detail How good are our methods of population forecasting How can we cope with the inevitable uncertainty What population trends can we anticipate Beyond Six Billion illuminates not only the forces that shape population growth but also the accuracy of the methods we use to quantify these forces and the uncertainty surrounding projections The Committee on Population was established by the National Academy of Sciences NAS in 1983 to bring the knowledge and methods of the population sciences to bear on major issues of science and public policy The committee s work includes both basic studies of fertility health and mortality and migration and applied studies aimed at improving programs for the public health and welfare in the United States and in developing countries The committee also fosters communication among researchers in different disciplines and countries and policy makers in government international agencies and private organizations The work of the committee is made possible by funding from several government agencies and private foundations
