Thinking About Development:

Thinking about Development Bjorn Hettne, 2013-04-04 This book is a concise and accessible introduction to development thinking contemporary development theory and practice and a critical analysis of the values that lie behind them Hettne argues that schools of development thinking should be historically contextualized not presented as evolving towards a universal theory The book will present development as an essentially contested concept that has meant a number of things at various times to different people in different places Focusing on historical discourses from the initial colonial encounters through to the modern day Hettne draws the connections between the enlightenment belief in progress through to the more recent focus on the Millennium Development Goals The first volume in the Development Matters series this book provides the key frame for the series as a whole enabling readers to locate texts on themes such as environmental justice technology and development learning within a broader historical conceptual and political context than the immediate policy and output needs of neoliberalism

Thinking about Development Paul Patrick Streeten, 1997-07-24 Paul Streeten is recognised as one of the profession's most eminent authorities on economic development In these lectures he provides a major statement on his approach to the development problem stressing that human development not simply income growth should be the focus of all strategies to eradicate hunger and poverty in the world His argument assigns an important role to reformed government both in providing social services and in facilitating the functioning of markets in opposition to the prevailing idea that minimal government is more often than not the optimal solution The role of small and larger firms institutions central and local government is also carefully examined Streeten outlines a normative political economy how to mobilise reformist alliances how to use interest group how to harness coalition in the pursuit of effective development

Thinking About Development Lisa Peattie, 2012-03-02 This book intends to be helpful to people students and others who are beginning to think about how to change the world via that activity we call development planning The issues of What is Progress and How do we get it are world wide although they appear in different form in societies like our own from the way they do in the Third World countries with their explicit development planning These are two very big questions and have no easy or final answers However we can think about them in more rather than less effective ways Thinking about them can be both a way of beginning to take action on issues of growth and change and a way of understanding our own situation vii viii I PREFACE This book argues that thinking about development planning has gotten into trouble by dividing economy from society and misconstruing moral social political issues as technical ones Development planning has centered on economic planning treating social issues as obstacles to growth or as problems arising out of economic change The book takes up a number of specific topics which enter into development planning topics such as the organization of work educational planning family policy to show how in reality the social and the economic the moral and the technical are one and how thinking about policy in each area should therefore take an integrated perspective
