Contested City Alissa Walter, 2025-02-04 Contested City offers a history of state society relations in Baghdad exploring how city residents managed through periods of economic growth sanctions and war from the oil boom of the 1950s through the withdrawal of US troops in 2011 Interactions between citizens and their rulers shaped the social fabric and political realities of the city Notably low ranking Ba th party officials functioned as crucial intermediaries deciding how regime policies would be applied Charting the social economic and political transformations of Iraq s capital city Alissa Walter examines how national policies translated into action at the local everyday level With this book Walter reveals how authoritarian governance worked in practice She follows shifts in mid century housing and urban development the impact of the Iran Iraq and Gulf Wars on city life and the manipulation of food rations and growth of black markets Reading citizen petitions to the government Walter illuminates citizens self advocacy and the important role of low ranking party officials and state bureaucrats embedded within neighborhoods The US occupation and ensuing sectarian fighting upended Baghdad s neighborhoods through violent displacement and the collapse of basic state services This power vacuum paved the way for new power brokers including militias and neighborhood councils to compete for influence on the local level

A People's History of Detroit Mark Jay, Philip Conklin, 2020-04-17 Recent bouts of gentrification and investment in Detroit have led some to call it the greatest turnaround story in American history Meanwhile activists point to the city s cuts to public services water shutoffs mass foreclosures and violent police raids In *A People s History of Detroit* Mark Jay and Philip Conklin use a class framework to tell a sweeping

story of Detroit from 1913 to the present embedding Motown's history in a global economic context Attending to the struggle between corporate elites and radical working class organizations Jay and Conklin outline the complex sociopolitical dynamics underlying major events in Detroit's past from the rise of Fordism and the formation of labor unions to deindustrialization and the city's recent bankruptcy They demonstrate that Detroit's history is not a tale of two cities one of wealth and development and another racked by poverty and racial violence rather it is the story of a single Detroit that operates according to capitalism's mandates *The Sanitary City* Martin V. Melosi, 2008-04-27 Immersed in their on demand highly consumptive and disposable lifestyles most urban Americans take for granted the technologies that provide them with potable water remove their trash and process their wastewater These vital services however are the byproduct of many decades of development by engineers sanitarians and civic planners In *The Sanitary City* Martin V Melosi assembles a comprehensive thoroughly researched and referenced history of sanitary services in urban America He examines the evolution of water supply sewage systems and solid waste disposal during three distinct eras The Age of Miasmas pre 1880 The Bacteriological Revolution 1880 1945 and The New Ecology 1945 to present day Originally published in 2000 this abridged edition includes updated text and bibliographic materials *The Sanitary City* is an essential resource for those interested in environmental history environmental engineering science and technology urban studies and public health

Courts of Appeals, 1886 [The Radicals' City: Urban Environment, Polarisation, Cohesion](#) Ralf Brand, Sara Fregonese, 2016-02-24 Bringing together comparative case studies from Belfast Beirut Amsterdam and Berlin this book examines the role of the urban environment in social polarisation processes In doing so it provides a timely and refreshingly innovative voice in the confusing babble on counter terrorism urban conflict and community cohesion Despite their socio political differences these cities are telling cases of how the location and shape of very mundane objects such as rubbish bins bridges clothes stores shopping malls and cafés in addition to the obvious fences walls and barbed wire are often subject to heated controversies and influence the way urban conflict is lived and practised Within a Science and Technology Studies STS theoretical framework the authors provide a systematic analysis of these four cities and provide many concrete and richly illustrated examples of material agency without losing sight of their specific historical political

geographical and social conditions The STS angle permits some surprising yet extremely convincing conclusions which are of use not only for a range of practitioners but also to scholars interested in the social shaping processes and the consequences of urban artefacts The authors argue that although architecture and urban design is clearly not the sole cause of conflict and polarisation neither is it completely innocent Conversely it cannot be the silver bullet to solve related problems and to create community cohesion However the materiality of our cities must not be ignored in fact it can and should be enrolled in our efforts The book contains detailed descriptions of such positive cases as inspiration for practitioners as diverse as policy makers architects urban designers planners community workers consultants or police officers
