Social Theory of Modern Societies David Held,John Brookshire Thompson,John B. Thompson,1989-12-07 This book offers a comprehensive appraisal of the work of Anthony Giddens who is known worldwide as one of the leading figures in social theory and the social sciences During the last decade Giddens has published a series of substantial volumes which have defined a distinctive and original theoretical approach The twin focal points of his approach are the theory of structuration and the analysis of modernity Giddens s writings on these and related themes are widely recognized as among the most important contributions to theoretical debate in the social sciences *Social Theory of Modern Societies* is the first volume to

provide a systematic and critical assessment of Giddens's contributions. The volume includes eleven critical essays, all of which were specially commissioned for this volume by authors who are well known in their own fields: Zygmunt Bauman, Richard J. Bernstein, Derek Gregory, Nicky Gregson, David Held, Bob Jessop, Linda Murgatroyd, Peter Saunders, Martin Shaw, John B. Thompson, and Erik Olin Wright. In a long concluding chapter, Anthony Giddens responds to the criticisms raised by these and other authors, clarifying and elaborating his current views. The result is a unique and engaging book which gives both a critical evaluation of Giddens's work and a guide to some of the theoretical issues which are at the forefront of the social sciences today. It will be of interest to students and academics in sociology, politics, and geography, and to students in the social sciences and humanities generally.

Religion, Realism and Social Theory Philip A. Mellor, 2004-09-29. Philip Mellor's ambition is to save sociology from itself or to save society from the sociologists. He has written a brilliant polemic and theoretically rich argument against the many fashionable contemporary social theories that provide acquiescent post-societal endorsements of the economic and technological forces that are hollowing out the religious, moral, and human dimensions of societies. I am tremendously impressed. Kenneth Thompson, Professor of Sociology at the Open University.

Religion, Realism and Social Theory challenges those contemporary sociologists who argue that the notion of society is an outmoded basis for sociological analysis and instead revitalizes the idea that sociology is truly the study of society. Through a bold and original argument, Philip Mellor returns the human and religious aspects of social life to the centre of social theory, drawing on a vast range of contemporary social theoretical literature in the process. The book comprehensively reassesses what societies offer, provides a detailed critique of current failings in social theory, draws out the religious underpinnings of social life, throws fresh light on the religious, cultural, and social conflicts that appear to herald a new period of global disorder. Religion, Realism and Social Theory will stimulate debate amongst academics and students of sociology and social theory, cultural studies, and the sociology of religion.

Public Relations and Social Theory Øyvind Ihlen, Magnus Fredriksson, 2018-04-17. Public Relations and Social Theory: Key Figures, Concepts and Developments broadens the theoretical scope of public relations studies by applying the work of a group of prominent social theorists to make sense of the practice. The volume focuses on the work of key social theorists including Max Weber, Karl Marx, John Dewey, Jürgen Habermas, Niklas Luhmann, Michel Foucault, Ulrich Beck, Pierre Bourdieu, Anthony Giddens, Robert Putnam, Erving Goffman, Peter L. Berger, Gayatri Chakravorty Spivak, Bruno Latour, Dorothy Smith, Zygmunt Bauman, Harrison White, John W. Meyer, Luc Boltanski, and Chantal Mouffe. Each chapter is devoted to an individual theorist, providing an overview of that theorist's key concepts and contributions and exploring how these can be applied to public relations as a practice. Each chapter also includes a box giving a short and concise presentation of the theorist along with a recommendation of key works and secondary literature.

Sociological Theory and Collective Subjectivity J. Domingues, 1995-11-01. The main theme of this book is collective subjectivity, analysed especially in connection with the work of Marx, Parsons, Giddens, and Habermas, but also addressing the

manifold tendencies of sociological theory from its inception to the present The book supports the idea that there is a conceptual shortcoming in the most relevant contemporary research programs in sociological theory despite some recent efforts to re develop concepts of collective actor class or social movement After the fragmentation of the sixties a number of synthetical approaches emerged Some writers such as Touraine Laclau and Mouffe Olson Coleman Hindess Mouzelis and Eder have proposed some versions of concepts of collective subjectivity focusing on collective actors classes genders social movements organisations and collective utilitarian action But they do not in terms of general conceptual construction go further than Parsons and Marx they often fail to match their original formulations The concept of collective subjectivity is introduced to bring together these diverse approaches which are synthesised and receive a more general definition Moreover this new concept is directly linked to those contemporary syntheses

The Sociology of Time Jiří Šubrt, 2021-11-09 In a critical comparative study of the sociological literature this book explores the term time and the various interconnections between time and a broad cluster of topics that create a conceptual labyrinth Various understandings of time manifest themselves in the context of many individual social problems there is no single vision in sociology of how to grasp time and address within social theory This book therefore attempts to define an approach to the concept of time and its associated terms duration temporality acceleration compression temporal structures change historical consciousness and others The volume is guided by a critical engagement with three main questions a the formation of human understanding of time b the functioning of temporal structures at different levels of social reality c the role and place of time in general sociological theory
