Miller,2021-07-05 This comprehensive resource now revised and expanded provides school practitioners with an evidence based framework for preventing and effectively responding to youth suicidal behavior David N Miller guides readers to understand screen and assess for suicide risk in students in grades K 12 He presents collaborative strategies for intervening appropriately within a multi tiered system of support The book also shows how to develop a coordinated plan for postvention in the aftermath of a suicide offering specific dos and don ts for supporting students parents and school personnel User friendly tools include reproducible handouts the book s large size format facilitates photocopying Purchasers get access to a webpage where they can download and print the reproducible materials New to This Edition Chapter on the roles and responsibilities of the school based suicide prevention team Significantly revised coverage of screening and suicide risk assessment Situates prevention and intervention within a schoolwide multi tiered system of support Updated throughout with current data practical recommendations and resources [Understanding Suicide and Its Prevention](#) Federico Sanchez,2010-06-15 Finally a book that explains suicide using the latest research in suicidology A must read for mental health professionals and the survivors of suicide who want to understand why suicide happens The material in this book should be incorporated into the curriculum of psychology and psychiatry because suicide is such a vital topic that is hardly covered in medical schools due to the lack of a coherent theory of the brain in general and suicide in particular This is an important book for all professionals who deal with mental disorders in general and suicide in particular It is the author s fifth book where suicide is explained not as a mysterious process but as a natural consequence of the reactions of the brain under certain conditions when suffering mental disorders The author begins with a brief summary of the statistics of the whos the hows and the wheres of suicide This gives us a clear idea of the magnitude of the problem of suicide of the cost not only in lives but of the emotional toll of the survivors as well as the financial burdens on society as a whole Then as an important first step to understanding the medical community s standard approaches to mental disease he reviews briefly the current psychiatric terminology and the diagnostic tools concerning mental disorders He presents the most accepted current theories and models of suicide He explains what a psychiatric emergency is and what to expect if one ever encounters such a situation And he explains how suicide risk assessment is currently done along with other important considerations He proceeds to explain in everyday language where possible his theory of how the brain works beginning with a simple explanation of how neurons communicate with each other Later he explains how the brain controls the body and how we see with the back of our heads how memory systems become a logical extension or expansion of our sensory and motor systems Awareness and attention are introduced first as an evolutionary tool that aids the senses gather more information from the environment and ultimately as tools that aid in thinking reasoning and constructing our past our lives and our identities But all this would mean nothing without the introduction of emotions and how the brain constructs contexts He explains how

emotions are an integral part of memories and how these are related to contexts how basically the brain has created a very concise and compact filing memory system A clear explanation of how emotions are triggered regulated and dissipated is next These lead to a learned discussion of how these various systems can go haywire causing mental disorders A brief but perhaps new and revolutionary approach to these mental disorders is presented next including Obsessive Compulsive Disorder Delirium Dementia and Other Amnestic Disorders Manic Depression and Depression and Schizophrenia Ultimately it becomes clear how under certain conditions these disorders can lead to suicide The difference between attempters and completers is also explained He then presents a suicide autopsy as an exercise to show how varied the opinions of experts in the field of suicidology are and compares it to his own theories and lets the reader decide for himself who is closer to the truth The fallacy of many expert opinions of where research needs to go is presented The book gives a few words of advice on various therapies and the rationality of their approaches and cautions against their limitations The book devotes a chapter to suicide prevention in the military and how these efforts are bound to fail and another chapter on suicide prevention The author makes important suggestions of how to prevent suicide and lessen suicide rates particularly among the young And lastly a chapter is devoted to the specifics of grief for suicide survivors

Suicide in Palestine Nadia Taysir Dabbagh, 2005 This book is the first anthropological study of suicide in the Arab world today It discusses the effects of life under Israeli occupation on the mental health of young Palestinians using selected case studies of men and women who have attempted suicide in the West Bank above all in the city of Ramallah but also in Jenin The book is not about martyrs or those who gain so much media attention by dying for a holy cause rather it concerns those who wish to die for entirely private reasons Contrary to what might be expected fatal suicide levels in Palestinian society remain low compared with Western norms despite the many stress factors that have been shown to contribute to suicidal behavior in the West including unemployment and social deprivation In particular suicide is found to be contrary to the concept of Palestinian identity of a people under siege for whom resistance is paramount rather than giving in to depression or despair Above all Nadia Dabbagh's findings confirm the importance of what she calls the ripple effects of war Her research was carried out after the first intifada during a so called peace building period but it clearly reveals the trauma suffered by Palestinians living in the Occupied Territories The stories she tells mirror the disillusionment of those who had hoped that their lives would improve once fighting subsided and the Palestinian National Authority had been established The book aims to foster an understanding of suicide in the Islamic world more generally looking at current and historical attitudes to death and self killing in Islamic and Arab thought The distinction between suicide and martyrdom

is explored in detail as are current perceptions of these phenomena in the Muslim world Book jacket Suicide-Related Behaviour Columba McLaughlin, 2007-09-04 Without doubt there is no greater problem facing mental health practitioners than suicide related behaviour Over the last thirty years the data gathered has consistently indicated that suicide is a leading cause of death in young people Currently the data indicates that in some areas suicide is increasing Alongside this the incidence of self harm which has always been high does not seem to be abating Some professionals argue that attempted suicide and self harm are both the same entity In this book it is put forward that they are two sides of the same coin and this coin is called suicide related behaviour This book makes sense of suicide related behaviour in terms of understanding its aetiology The term suicide related behaviour is a general term used to describe all behaviours where the person intended to kill or harm him her self In so doing relevant issues within the phenomenon of suicide related behaviour and specific to both self harm and attempted suicide will be explored and addressed in this book This book includes the following The varying differences within the concept of suicide related behaviour shown by reflecting on some of the authors own experiences Contemporary issues are explored through discussion and student exercises An exploration of terms used and how they can be interpreted Why and how a person would consider suicide related behaviour as an option exploring the descent and response to crisis ranging from biological psychological and social Considers the case for a caring response and the qualities needed in practitioners Suicide Related Behaviour Understanding caring and therapeutic responses is a fundamental read for those students considering a career in mental health care nurses medical students social workers psychologists occupational therapists and other related mental health practitioners **Cry of Pain** J. Mark G. Williams, 1997 Any person grieving for someone who has committed suicide copes with a question that can never be answered Why In this enlightening book directed at the lay person and professional alike a clinical psychologist draws on the latest research to explore suicide from all aspects its history changing sociological patterns psychiatric and psychological factors and moral issues This book is a compassionate and balanced attempt to bring some understanding to the painful feelings that lead to such an extreme act without judging generalizing or misreading the messages of suicidal behavior **The Psychologist** ,2001 *Canadian Journal of Psychiatry* ,2006
