What is Paleo Diet Basically Paleo diet is a fancy word for caveman diet it s what our ancestors used to consume tens of thousands of years ago when hunting was the only way to acquire food The fundamental concepts behind the Paleo diet boil down to the genetic level Simply put our DNA has not significantly changed over the past 40 thousand years and therefore our bodies have not yet fully reformed to the contemporary highly processed and artificial food items that are available in abundance nowadays Thus the Paleo style of eating is the most biologically appropriate diet for us

What can I eat Paleo diet includes anything that can be hunted or gathered Clearly hunting is not an option to acquire food nowadays but you can still obtain it from a supermarket if of course the food was readily available during the Paleolithic period Paleo diet includes and is not limited to meat fish vegetables eggs shellfish tree nuts roots fruits coconut palm sugar and raw honey Dairy potatoes processed oils grains legumes and sugars are to be avoided along with salt and any drinks except water coconut water and green tea The diet of course eliminates any processed and ready made foods available today and is gluten free largely due to the exclusion of grains
