The Race for What's Left Michael Klare, 2012-03-13 Journalist Klare describes the impact the coming shortage of natural resources will have on the future of the human race *What's on the Air*, 1930 **Securitizations of Citizenship** Peter Nyers, 2009-05-19 Securitizations of Citizenship critically assesses the fate of citizenship in relation to securitized practices of surveillance and control that have emerged in the post 9 11 period [The Strange Non-death of Neo-liberalism](#) Colin Crouch, 2011-08-08 Winner of the Friedrich Ebert Stiftung prize The financial crisis seemed to present a fundamental challenge to neo liberalism the body of ideas that have constituted the political orthodoxy of most advanced economies in recent decades Colin Crouch argues in this book that it will shrug off this challenge The reason is that while neo liberalism seems to be about free markets in practice it is concerned with the dominance over public life of the giant corporation This has been intensified not checked by the recent financial crisis and acceptance that certain financial corporations are too big to fail Although much political debate remains preoccupied with conflicts between the market and the state the impact of the corporation on both these is today far more important Several factors have brought us to this situation Most obviously the lobbying power of firms whose donations are of growing importance to cash hungry politicians and parties The weakening of competitive forces by firms large enough to shape and dominate their markets The power over public policy exercised by corporations enjoying special relationships with government as they contract to deliver public services The moral initiative that is grasped by enterprises that devise their own agendas of corporate social responsibility Both democratic politics and the free market are weakened by these processes but they are largely inevitable and not always malign Hope for the future therefore cannot lie in suppressing them in order to attain either an economy of pure markets or a socialist society Rather it lies in dragging the giant corporation fully into political controversy Here a key role is played by the small cash strapped campaigning groups who with precious little help from established parties seek to achieve corporate social accountability
