When Size Matters:

White Men Can't Hump (As Good As Black Men) Todd Wooten, 2006-10 *White Men Can't Hump* is a book of hope. The hope is that one day Black Men in America will no longer be viewed as unintelligent, unattractive, undesirable, uncivilized, and just plain old worthless. *White Men Can't Hump* will address why Black Men in America are perceived in such a negative way and will also explore the origins of this negativity. *White Men Can't Hump* will also explore how this negativity has been spread for the last four centuries: a la stereotypes and why this negativity has been spread a la Fear of the Black Penis. Several of these so-called negative stereotypes will be closely examined and shown in a new light. *White Men Can't Hump* will ask why two well-known stereotypes that have been historically assigned to Black Men are only considered negative when applied to Black Men. Most men desire a large penis and an elevated sexual prowess, but all across America, in offices, bars, and locker rooms, the Black Penis and Black Prowess are routinely the punch line to jokes. *White Men Can't Hump* will ask why and will also ask a question that will create a debate for the ages: Who's better in bed, Black Men or White Men? *White Men Can't Hump* will take you, the reader, on an educational and enlightening journey through America's past and present with the hope of changing America's future. So sit back and enjoy, or cuss, agree, or disagree, and most importantly, think with an open mind. Because whether you like it or not, *White Men Can't Hump* tells the story of who all of us are, where we've come from, and where we're going. *White Men Can't Hump* is divided into two VOLUMES. VOLUME I focuses on how Sex has historically affected Race relations in America, and VOLUME II focuses on how Race has affected Sex relations in America. Don't be confused by the similar titles because both VOLUMES pack a different Sexual, Racial, Political, and Social punch. For more information, feel free to visit www.whitemencanthump.com. Enjoy the ride, my friend. **Advanced Query Processing**

Barbara Catania, Lakhmi C. Jain, 2012-07-28 This research book presents key developments, directions, and challenges concerning advanced query processing for both traditional and non-traditional data. A special emphasis is devoted to approximation and adaptivity issues as well as to the integration of heterogeneous data sources. The book will prove useful as a reference book for senior undergraduate or graduate courses on advanced data management issues which have a special focus on query processing and data integration. It is aimed for technologists, managers, and developers who want to know more about emerging trends in advanced query processing. *One Man's Planet* Stephen M. Testa, 2009 *One Man's Planet* is a slightly off-centered geologist's introduction to how politics, pop culture, and the earth sciences mix it up every day in all of our lives. A humorous look at a myriad of issues that grace the news and drive political debates from local councils to international discourse. *One Man's Planet* picks apart the rhetoric on all sides of these debates to look at how the science describes the issue, often to the nakedness of the opposing parties. Tackling topics like climate, energy, water, and hazards, Stephen Testa channels Beanie Babies, Mad Max, and Shakespeare among others to examine the latest scientific understanding of these issues. Author Stephen Testa weaves science, personalities, pop culture, and politics into a very

informative and entertaining tapestry on the planet today and the planet's tomorrow. Come tour the Earth with Testa as your guide. *Mastering the Game of Life 2* Paul D. Lowe, 2020-12. We live in fragile and somewhat febrile times so many people feel disenfranchised and powerless as the world spins faster and increasingly unpredictably. This wonderful book is filled with inspirational stories of real people doing real things to make a profound difference. If there was ever a book to inspire a new age of optimism and to catalyse a renaissance for our precious planet then this is it. Dr Richard Gerver Educator Author Speaker.
