Concepts, Theories, and the Mind-Body Problem Herbert Feigl, 1958 *Concepts Theories and the Mind Body Problem* was first published in 1958 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions This is Volume II of the Minnesota Studies in the Philosophy of Science a series published in cooperation with the Minnesota Center for Philosophy of Science at the University of Minnesota The series editors are Herbert Feigl and Grover Maxwell who are also co editors with Michael Scriven of this volume The ten papers by eleven authors which make up the content of this volume are the result of

collaborative research of the Center in philosophical and methodological problems of science in general and psychology in particular. The contributors are Paul Oppenheim, Hilary Putnam, Carl G. Hempel, Michael Scriven, Arthur Pap, Wilfrid Sellars, H. Gavin Alexander, P. F. Strawson, Karl Zener, Herbert Feigl, and Paul E. Meehl. In addition, an extensive discussion of Internationality and the Mental by Wilfrid Sellars and Roderick Chisholm is presented in an appendix. In a review of this volume, the journal *Psychiatric Quarterly* commented: "These essays will not prove easy for the layman to read but he can hardly fail to find his effort rewarded if he is persistent. For the professional behavioral scientist, increased awareness and caution in his use of scientific language and thinking about scientific theory should result." One of the papers in this volume, "The Mental and the Physical" by Herbert Feigl, has been published by the University of Minnesota Press with further discussion by Dr. Feigl as a separate book, *The Mental and the Physical: The Essay and a Postscript*. **This is Philosophy of Mind** by Pete Mandik, 2013-05-21. This is Philosophy of Mind presents students of philosophy with an accessible introduction to the core issues related to the philosophy of mind. Includes issues related to the mind-body problem, artificial intelligence, free will, the nature of consciousness, and more. Written to be accessible to philosophy students early in their studies. Features supplemental online resources on <https://www.wiley.com/en-us/thisisphilosophy>, thisphilosophyofmind.com, and a frequently updated companion blog at <http://tipom.blogspot.com>. **The Chief Works of Benedict de Spinoza: De intellectus emendatione. Ethica. Correspondence. (abridged)** by Benedictus de Spinoza, 1891. [Representation and the Mind-body Problem in Spinoza](#) by Michael Della Rocca, 1996. This book offers a powerful new reading of Spinoza's philosophy of mind, the aspect of Spinoza's thought often regarded as the most profound and perplexing. Michael Della Rocca argues that interpreters of Spinoza's philosophy of mind have not paid sufficient attention to his causal barrier between the mental and the physical. The first half of the book shows how this barrier generates Spinoza's strong requirements for having an idea about an object. The second half of the book explains how this causal separation underlies Spinoza's intriguing argument for mind-body identity. Della Rocca concludes his analysis by solving the famous problem of whether, for Spinoza, the distinction between attributes is real or somehow merely subjective. **The Journal of the Michigan State Medical Society**, 1912. [Nature](#) by Sir Norman Lockyer, 1919.
