Climate Change 2001: Mitigation Bert Metz, 2001-07-12 Climate Change 2001 Mitigation is the most comprehensive and up to date scientific technical and economic assessment of options to mitigate climate change and their costs The report Makes clear there are strong inter linkages between climate change policy and policies towards sustainable development Assesses information on technological options to reduce greenhouse gas emissions or enhance their sinks Analyses technologies and practices available to achieve the targets of the Kyoto Protocol and stabilise atmospheric concentrations of greenhouse gases Evaluates barriers impeding implementation of these options and methods available to overcome them Summarises the economic literature on costs of climate change mitigation at global regional and national levels Evaluates the other benefits that climate policy can deliver or the climate benefits of other socio economic policies Assesses how this information can be used to support climate policy decision making acknowledging various decision making frameworks This latest IPCC assessment will again form the standard scientific reference for all concerned with climate change and who want to be informed of ways to address this important global problem including students and researchers in environmental and social sciences and policymakers and analysts in governmental and non governmental organisations and the private sector world wide

Collateralized Debt Obligations Albert Schaber, 2009 This book offers insights into three different aspects of Collateralized Debt Obligations CDOs The first section covers a mechanism that explains the sale of first loss positions to investors The theoretical model is based on a repeated game and focuses on the role of issuer reputation The second section empirically analyzes combination notes These are a particular type of security issued in CDOs consisting of parts of different tranches of one CDO transaction The findings show that combination notes are used as an equity transfer vehicle and that their tranching caters to segmented demand The third section finally analyzes the

tranching of CDOs A transaction cost based hypothesis of tranching is proposed and verified empirically *Independent Energy*, 1990 **OECD Economic Surveys: Germany 2016** OECD, 2016-04-05 This 2016 OECD Economic Survey of the Germany examines recent economic developments policies and prospects The special chapters cover Boosting investment performance and Raising well being in Germany's aging society **Contract Law in International Commercial Arbitration** Peter Sester, 2022-11-22 The vast bulk of claims in international commercial arbitration are contractual in nature Viewed through that lens what comes to occupy centre stage in the arbitration of disputes is the choice of applicable contract law This book breaks new ground by for the first time focusing in depth on the contract law chosen by the parties to be applied to disputes The author uses a comparative inductive methodology to analyse why according to statistics of the International Chamber of Commerce English New York and Swiss contract law outperform transnational and other contract law regimes in the choice of law provision of business contracts He finds that these three bodies of law share a firm commitment to enforcing the contract as written thus prioritizing certainty stability and predictability and clearly recognizing the parties right to determine for themselves and have arbitrators and courts respect central issues such as risk allocation and price Starting from a detailed comparative examination of traditional and contemporary theories of contract the author develops a minimalist approach that is acceptable to lawyers with a civil or common law background and that facilitates dealmaking by providing a clear set of hard edged rules in four areas formation of contracts invalidity and public policy contract interpretation and damages for breach and showing how each of the three contract regimes that are dominant in practice manifests his approach With its emphasis on pragmatic adjudication grounded on facts and consequences rather than on conceptualisms and generalities the book greatly enhances the ability of arbitrators to make decisions based on legal arguments that fit the setting of international commercial arbitration It is sure to become established as a tool to achieve the defined objective of facilitating cross border commercial transactions as well as providing arbitrators with a set of rules for the interpretation of contractual provisions and the quantification of damages Peter Sester confronts the reality that disputes in commercial arbitration are overwhelmingly contract based and properly directs our attention away from the contract by which the parties agreed to arbitrate to the contract by reference to which they intended their disputes to be adjudicated This is a most welcome move and one that cannot help stimulate those whose interests are similarly situated on the frontier between the law of arbitration and the law of international contracts Prof George A Bermann Columbia University New York City This is a book that is not only useful but also close to market expectations Summing up I would like to congratulate Peter Sester for giving us a free market society book He provides his readers with much food for thought and a remarkable admonition not to replace the parties work with public policy considerations Prof Dr Peter Nobel Emeritus Universities St Gallen and Zurich Switzerland *Subject Catalog* Library of Congress, Knowledge, Industry and Environment Richard Le Heron, Roger Hayter, 2018-02-06 This title was first published in 2002 Bringing together a wide range of theoretical and
