The Consequences Of Abortion:

Abortion United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Constitutional Amendments,1974 *Sex and Consequences* Phillip B. Levine,2020-11-10 How do individuals change their behavior when abortion access increases In this innovative book economist Phillip Levine uses economic analysis to consider this question comparing abortion to a form of insurance Like insurance he contends abortion provides protection from downside risk A pregnant woman who would otherwise give birth to an unwanted child has the option to abort On the other hand the availability of this option may increase the likelihood of a pregnancy in the first place In a very restrictive abortion environment few women would choose to have an abortion legalizing abortion would reduce unwanted births But if abortion becomes readily available it may cause individuals to increase their sexual activity and or reduce their use of contraception Levine contends Women will become pregnant more frequently but will abort those pregnancies Therefore these abortions will not reduce unwanted births Levine s analysis suggests that the manner in which individuals change their behavior depends on the extent to which abortion is accessible He supports these assertions using data from both the United States and Eastern Europe comparing areas that have restricted access to abortion services with those that have liberalized access Using sound economic analysis *Sex and Consequences* goes beyond the ideological arguments that frequently dominate the abortion debate lending a new perspective to this controversial subject **The Sociocultural and Political Aspects of Abortion** Alaka Basu,2003-01-30 Seeking to define the ways various cultures view pregnancy miscarriage and abortion this multidisciplinary collection of essays seeks to illustrate how these views influence policy decisions and practices regarding abortion around the world Putting questions of pro life and pro choice aside the contributors provide demographic coverage of the issues involved and contextualize some of the personal realities that underlie the approximately 50 million abortions that are believed to take place yearly worldwide While the political and social climates in which women seek abortions vary from place to place many of the chapters try to understand the moral implications that guide the decision to end a pregnancy from the perspective of the those who seek to do so Focusing primarily on developing nations this important contribution to the literature on abortion provides readers with a careful overview of the different meanings attached to abortion depending on the cultural social and political climate Areas covered include Tanzania Bangladesh West Africa Ghana Romania Russia Mexico and Nigeria General chapters on induced abortion demographic research and abortion policy and social pressures to abort are also included This unique approach to the study of abortion will contribute to a greater understanding of a prominent social issue *Transactions* Homoeopathic Medical Society of the State of Pennsylvania,1890 *Psychological and Medical Aspects of Induced Abortion* ,1988-06-10 Listing of five hundred titles that are either classics in the field or representational of the kinds of writing being published on the subjects of interest Also includes some audiovisuals Contains English language and translated works Topical arrangement Author title subject indexes *A Manual of Legal Medicine*

Justin Herold,1898 *Pamphlets - Homoeopathic* ,1891 *The Effects of Short-term Variation in Abortion Funding on Pregnancy Outcomes* Philip J. Cook,1996 In 1978 North Carolina created a special fund to pay for abortions for indigent women The appropriations for that fund have proven inadequate during five of the years in which it has been in operation with the result in each case that no state funding was available for several months This on again off again funding pattern provides a natural experiment for estimating the short run effect of changes in the cost of abortions on the number of abortions and births to indigent women We utilize a unique dataset obtained from the State which includes individual records for all pregnancies terminated in the State since 1978 We estimate the effects of funding termination on the abortion rate per month the birth rate per month adjusted to take account of variations in gestation periods and the probability that a pregnancy will end in abortion for various demographic groups The results suggest that the decisions of poor black women aged 18 29 are particularly sensitive to the availability of abortion funding Overall approximately 3 in every 10 pregnancies that would have resulted in an abortion had state funds been available are instead carried to term *The Consequences of Imperfect Fertility Control for Children's Survival, Health, and Schooling* Mark Montgomery,1997 **Economic Impact of Unsafe Abortion-related Morbidity and Mortality** Michael Vlassoff,2008 *Transactions of the ... Annual Session* Homœopathic Medical Society of the State of Pennsylvania,1890 List of members in each volume *Medication Abortion: Implications for Abortion Care Provision in the United States* Tracy Ann Weitz,2006 Annually over 1 3 million abortions are performed in the US Despite ongoing need the number of health care facilities which offer abortion care continues to decline In 1988 a new abortion technology mifepristone aka RU486 or the abortion pill was introduced in France Use of this drug to induce a miscarriage is generically referred to as a medication abortion US availability of mifepristone was expected to result in an increase in providers offering abortion care Approval in the US however was not obtained until 2000 and since then the uptake by non abortion providing physicians has been slow **Ruling Case Law** ,1929 [The Determinants and Consequences of Population Trends](#) United Nations. Department of Economic and Social Affairs,1973 **Chironian** ,1889 [The Hope Clinic for Women, Ltd. V.
