Why America Doesn't Work

Susan Fowler

Why America Doesn't Work:

Why America Doesn't Work Charles W. Colson, Jack M. Eckerd, 1991 Here is a landmark book that could have significant impact on the future of this nation From their unique vantage points as respected national leaders Colson and Eckerd have written this stinging analysis of the decline of the American Work Ethic and its devastating impact on our nation's future

Why America Doesn't Work Charles W. Colson, Jack Eckerd, 1992-10 In this uncompromising bestseller two veterans of public service and private business reveal how America's work ethic has been stripped of its true meaning Readers are then given the critical steps necessary to halt America's declining work ethic through an infusion of unique programs hard work and a renewed sense of integrity Colson founded the Board of Prison Fellowship Ministries and Eckerd founded the Eckerd drugstore chain

Why Conservatives Tell Stories and Liberals Don't David M Ricci, 2015-12-03 Why do conservatives tell stories Because it helps them win elections and assail liberal policies like health care reform and economic stimulus Why is important but the what and the how behind the stories that conservatives tell are equally interesting and in this new book David Ricci reveals all He shows how conservative activists and candidates tell many tales that come together to project a large scale story a cultural narrative a vision of what America is and what it should do to prosper socially economically and politically Liberals by contrast tend to look for theories rather than stories for mathematical explanations rather than theological axioms for data rather than anecdotes and for statistics rather than homilies The difference is paradoxical Liberals are unlikely to fashion sweeping narratives that capture the public's attention and commitment Yet conservatives may tell attractive stories like the ones that got us into Iraq that momentarily capture voter support but end up costing the country more than it can afford

Educational Research: Why 'What Works' Doesn't Work Paul Smeyers, Marc Depaepe, 2007-01-07 Education and educational research according to the current fashion are supposed to be concerned with what works to the exclusion of all other considerations All over the world and particularly in the English speaking countries governments look for means of improving student achievement as measured by standardized test scores Although such improvements are often to be welcomed they do not answer all significant questions about what constitutes good education Also the research on which they are based is not the only legitimate way to do educational research Social research and therefore educational research cannot ignore the distinctive nature of what it studies a social activity where questions of meaning and value cannot be eliminated and where interpretation and judgment play a crucial role In this book distinguished philosophers and historians of education from 6 countries focus on the problematical nature of the search for what works in educational contexts in practice as well as in theory Beginning with specific problems they move on to more general and theoretical considerations seeking to go beyond over simple ideas about cause and effect and the rhetoric of performativity that currently has educational thinking in its grip Freedom of inquiry in educational research can no longer be taken for granted Narrow definitions of what constitutes scientific research funding criteria that enforce particular research methods

and policy decision processes that ignore any research that is not narrowly utilitarian create a context in many countries that discourages scholarship of a more speculative exploratory or critical sort This book brings together an exceptional combination of international and cross disciplinary scholars who bring the perspectives of history and philosophy of science to ask How did we arrive at this place and Where is educational research heading Thebook illuminates the anti intellectual consequences of a what works mentality in education and shows that the ostensibly scientific revolution in educational research in fact reflects an ahistorical and conceptually muddled understanding of what actually constitutes science This book could not be more timely and important Nicholas C Burbules Grayce Wicall Gauthier Professor University of Illinois With research increasingly tied to State policies with the instrumental purpose of guiding school reforms the volume provides an important historical and philosophical questioning of the possibilities limitations and challenges of education research Internationally leading scholars engage in a significant conversation that is sophisticated and nuanced for understanding contemporary debates Thomas S Popkewitz the University of Wisconsin Madison USA This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Reseach

Redeeming the Time Leland Ryken,1995-10 A fully developed biblical perspective of work and leisure finds the holistic balance missing from today in Puritan enjoyment of both as important to life

Digital Disinformation Peter Chew,Matthew Fort,Jonathan Chew,2023-05-18 This book uniquely combines the authors personal experiences deep cultural and professional experience of living and working in Russia and the former USSR and interest and experience with language and computational analysis to shed light on a highly contemporary question what is motivating conflict and unrest in Russia and its surrounding countries How does Russian government suppression of information manifest in practice today and how does it fit into the historical cultural pattern for Russia The authors take a computational look at social and traditional media in the original languages from Russia Ukraine Lithuania Latvia Estonia Poland and the English speaking world to glean insights and separate fact from fiction This book helps readers interested in Eastern Europe to take the temperature of the region today but it is also of interest to readers in the policy and analysis community because it offers a template an analytical how to guide which aims to follow in the footsteps of CIA author Richards Heuer s Psychology of Intelligence Analysis to show how state of the art computational analysis techniques could be applied to similar problems in other topic areas with the human analyst and computational techniques each working together to create a whole greater than the sum of its parts
