Framework Sustainable Travel:

Tourism for Sustainable Development in Least Developed Countries World Tourism Organization, International Trade Centre UNCTAD/WTO., Enhanced Integrated Framework, 2017 **Greening government** Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2009-08-05 This is the Committee's eighth report on the sustainable operations on the Government estate There has been some progress against targets but the Sustainable Development Commission has found that in 2007-08 the Government was not on track to meet its target for the reduction of carbon emissions from its own buildings The Government was on track to meet its targets for recycling and for the sourcing of electricity from renewable sources but it performed less well than it had in 2006-07 It must improve the sustainability of its operations each year The ease with which the Government continues to meet some targets even when its performance worsens indicates the urgent need for the Government to set itself more stringent targets The Government should extend the system of targets and monitoring beyond central government and agencies to the wider public sector including its outsourced operations The Government has the potential to drive change in the wider economy through sustainable procurement through investment in low carbon technologies and by driving the development of green skills in the workforce But the Sustainable Development Commission found that Government performed poorly against its own targets The Government must use its buying power to drive progress towards a greener economy Many of the changes to the governance of Government's sustainable operations have been confusing or ineffective The Government must ensure that there is a clear line of accountability for these matters and the Cabinet Office Minister responsible must take an active role in overseeing performance management *Cultural Sustainable Tourism* Uglješa Stankov, Sofia-Natalia Boemi, Sahar Attia, Stella Kostopoulou, Nabil Mohareb, 2019-04-23 This book includes research papers submitted to and presented during the first international conference on Cultural Sustainable Tourism CST that was held in Thessaloniki Greece in November of 2017 Discussing complex relations between Culture tourism and the role of planners and architects in their maintenance this conference was jointly organized by IEREK International Experts for Research Enrichment and Knowledge Exchange and Aristotle University of Thessaloniki The conference was an attempt to shed a light on the significance of Culture and Heritage as two important factors attracting tourists and promoting economic growth and convey civilizations through tourism Themes covered in this book give an overview on current research and topics of discussion that focus on Cultural sustainable tourism through several sections The first section titled Art Architecture and Culture discusses urban regeneration as a road to the preservation of cultural and tourist destinations and the importance of understanding and benefitting from our heritage to allow for modern day improvements Heritage Tourism the section 2 of the book is more focused on offering nontraditional solutions and management plans to sustain cultural tourism and improve quality of life around historically significant areas The third section on the City and Rural Tourism follows by providing sustainable strategies to attract tourists and promoting the use of
