

The Harvard Center for Work-Life Research has developed the following guide for employers

The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the employees you'll have, and the employees who would also need to manage it.

The way to build a hybrid work model is to first ask what people want for themselves, and address the most common challenges they face.

Have you thought about how you could deliver a personalized employee experience? How will you support the employees' own needs as they work the workplace in full?

Hybrid work can be made to work better, the more people there are that there is.
