*Environment-Friendly Products—Adapt Green Now* Dr. Aparna P. Goyal, 2017-12-14 Excessive pollution has provoked the nature and the nature starts behaving in unnatural ways in form of global warming versus global cooling heavy rains versus draught and other natural calamities like frequent earthquakes and tsunami cyclones epidemics and so forth Economic growth via production and consumption threatens peaceful life of human beings on the earth Environment friendly eco green marketing is an attempt to protect consumer welfare and environment the nature through production consumption and disposal of eco friendly products Basically green marketing is concerned with three aspects 1 promotion of production and consummation of pure quality products 2 fair and just dealing with customers and society and 3 protection of ecological environment Thus green marketing is a marketing philosophy that promotes production and selling of pure eco friendly products with protection of ecological balance Green marketing involves multiple activities Green marketing encourages production of pure products by pure technology conservation of energy preservation of environment minimum use of natural resources and more use of natural foods instead of processed foods Efforts of people social organizations firms and governments in this regard can be said as green marketing efforts Green marketing raises the voice against production consumption and or disposal of such products that harm consumers the society and the environment anyway It is necessary that businessmen and users should refrain from harmful products [Green Marketing Perspectives](#) Sonu Dua, Sakshi Dua, Pawanpreet Kaur, 2025-04-29 Demonstrating the profound impact of the Green Concept s emergence and how companies are altering their marketing strategies to leverage green and sustainable messaging this work presents real cases from around the world and how they are used for business success *Proceedings of the 1st Widyatama International Conference on Management, Social Science and Humanities (ICMSSH 2024)* Viddi Mardiansyah, R. sustainable production of renewable resources from land fisheries and aquaculture environments and their conversion into food feed fibre bio based products and bio energy as well as related public goods Despite the relevance of achieving a sustainable bioeconomy there are very few publications in this field Addressing that gap this book illustrates how biological resources and ecosystems could be used in a more sustainable efficient and integrated manner in other words how the principles of sustainable bioeconomy can be implemented in practice Given its interdisciplinary nature the field of sustainable bioeconomy offers a unique opportunity to address complex and interconnected challenges while also promoting economic growth It helps countries and societies to make a transition and to use resources more efficiently and shows how to rely less on biological resources to satisfy industry demands and consumer needs The papers are innovative cross cutting and include many practice based lessons learned some of which are reproducible elsewhere In closing the book prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and Transfer Centre WSD RTC reiterates the need to promote a sustainable bioeconomy today

Being Mindfully Green: The Effects of Consumer Mindfulness on Green Product Choices Sabina Dörner,2022-03-21 Research Paper postgraduate from the year 2021 in the subject Psychology Work Business Organisation grade 1 0 Maastricht University language English abstract Research indicates that mindfulness is a consumer characteristic that influences the choice between green and non

green products Therefore this research proposal examines the effects of consumer mindfulness on green product choices and the moderating role of cognitive load in this relationship The study predicts that consumer mindfulness leads to the choice of greener products and that this effect is attenuated by cognitive load A between subject experimental study will be conducted with a sample of 128 students from Maastricht University The research hypotheses will be tested using a binary logistic regression I propose that mindfulness significantly predicts green product choices suggesting that mindful consumers are more likely to choose green products than non mindful consumers Furthermore cognitive load will moderate the effects of mindfulness on green product choices When cognitive load is high consumers are less likely to purchase green products when they are mindful than when cognitive load is low From the research results it can be inferred that encouraging consumers to be mindful is beneficial in promoting the purchase of sustainable products when cognitive load is kept low In addition the study identifies limitations and gives recommendations for future research
