[The Paston Family in the Fifteenth Century: Volume 1, The First Phase](#) Colin Richmond, 1990-09-27 The Pastons of Paston Norfolk are famous for the collection of letters and papers which bear their name In particular the Paston Letters have been well known since the time of Horace Walpole although until now they have never been used systematically by historians of fifteenth century England they are both

immensely attractive to read and fiendishly difficult to use as source material from which to write history This volume describes in lively and original style the beginnings of the family's gentility and sets out some of the major themes of their history between 1400 and 1500 Many of the themes are common to all gentry families of the later Middle Ages a period critical in the formation of the English polity It might also be said that the Pastons epitomize a class which since the later Middle Ages has dominated the English state English society and English culture *Paston Letters and Papers of the Fifteenth Century...*, 1971

Medieval Women's Writing Diane Watt, 2007-10-22 Medieval Women's Writing is a major new contribution to our understanding of women's writing in England 1100-1500. The most comprehensive account to date it includes writings in Latin and French as well as English and works for as well as by women. Marie de France, Clemence of Barking, Julian of Norwich, Margery Kempe and the Paston women are discussed alongside the Old English lives of women saints. The Life of Christina of Markyate, the St Albans Psalter and the legends of women saints by Osborn Bokenham. Medieval Women's Writing addresses these key questions: Who were the first women authors in the English canon? What do we mean by women's writing in the Middle Ages? What do we mean by authorship? How can studying medieval writing contribute to our understanding of women's literary history? Diane Watt argues that female patrons, audiences, readers and even subjects contributed to the production of texts and their meanings, whether written by men or women. Only an understanding of textual production as collaborative enables us to grasp fully women's engagement with literary culture. This radical rethinking of early women's literary history has major implications for all scholars working on medieval literature on ideas of authorship and on women's writing in later periods. The book will become standard reading for all students of these debates.
