

Thorne Moors

James William Tutt

Thorne Moors:

Thorne Moors Catherine Caufield,1991-01 Although not an area of outstanding beauty Thorne Moors a raised peat bog on the Licolnshire Yorkshire border is home to more than 4000 species of plants and animals including more than 25 of Britain s rarest and most severely endangered species Much of the moor was drained by the Dutch in the 17th century and in more recent times has been considered as a site for dumping ash from power stations and debris from mine workings and was even a potential site for an airport All this has happened even though the area was listed in 1970 as an area of Special Scientific Interest It now belongs to Fisons who are extracting the remaining peat Future Nature W.M. Adams,2004-04-26 The countryside is changing faster than ever Fifty years of conservation achievements in the UK are now being confronted by a new complexion of economic forces that are driving change in the countryside At the same time new ideas in conservation are altering the role that conservation is being asked to play in negotiating the transition from past to future This revised edition of Bill Adams classic work Future Nature tackles the new challenges in the countryside and wildlife conservation head on through a new Introduction and Postscript with updated arguments about naturalness and our social engagement with nature and complemented by a new Foreword by Adrian Phillips Concepts such as biodiversity and sustainability and changes in our understanding appreciation and concern for nature offer unprecedented opportunities Bill Adams explores the scientific cultural and economic significance of conservation He argues that conservation must move beyond the boundaries of parks and reserves to embrace the whole countryside The importance of conservation for the future is enormous It holds the potential to create new spaces for nature both in the landscape and in our lives and imaginations This factual beautifully written and thought provoking book offers a fundamental reassessment of conservation its importance and how to achieve it Published with BANC The Peatlands of Britain and Ireland Clifton Bain,2022-02-02 Clifton Bain now completes his trilogy with this look at the Peatlands of Britain and Ireland A source of fuel for many generations they are now a haven for wildlife and plants as well as a storehouse of greenhouse gasses Their social history is one of exploitation and the value of mending and restoring is a major theme of the book Like its predecessors The Peatlands of Britain and Ireland will be a sumptuous volume richly illustrated with photographs and with drawings by the wildlife artist Darren Rees Rothschild's Reserves: Time and Fragile Nature Miriam Rothschild,Peter Marren,2023-08-14 The somewhat enigmatic title of this book by one of Britain s most distinguished scientists in collaboration with a highly respected natural history writer belies the arresting nature of its content Eighty years ago Miriam Rothschild s father Charles Rothschild said by some to have been the inventor of nature conservation in Britain first proposed the establishment of a network of 280 national nature reserves throughout the country to preserve the cream of its wildlife habitats a monumental task In this book she and her co author discuss the efforts that went into the selection of these reserves and compare the state then and now of 182 of the English sites and their wildlife depressing reading in many cases The authors hope to spur everyone interested

in the survival of the British countryside to take remedial action to safeguard it before it is too late Published by Balaban in association with Harley Books now Apollo Books who are sole UK and European distributors
