Advances in Emotion Regulation: From Neuroscience to Psychotherapy Alessandro Grecucci, Remo Job, Jon J. Frederickson, 2017-08-24 Emotions are the gift nature gave us to help us connect with others Emotions do not come from out of nowhere Rather they are constantly generated usually by stimuli in our interpersonal world They bond us to others guide us in navigating our social interactions and help us care for each other Paraphrasing Shakespeare Our relationships are such stuff as emotions are made of Emotions express our needs and desires When

problems happen in our relationships emotions arise to help us fixing those problems However when emotions can become dysregulated pathology begins Almost all forms of psychopathology are associated with dysregulated emotions or dysregulatory mechanisms These dysregulated emotions can become regulated when the therapist helps clients express face and regulate their emotions and channel them into healthy actions This research topic gathers contributions from affective neuroscientists and psychotherapists to illustrate how our emotions become dysregulated in life and can become regulated through psychotherapy [The Science of Happiness Workbook](#) Greater Good Science Center, Kira M. Take The Mystery Out of Meditation Change Your Life For The Better How many times have your friends told you to meditate and you feel like yes but don t know how to Maybe you re looking for a natural way to relax and deal with stress Or maybe you ve been trying for years to meditate but get confused with all the knowledge and spirituality In fact Meditation is a simple practice available to all Research over the past two decades concludes that mindfulness meditation exerts beneficial effects on physical and mental health as well as cognitive performance Which means you can reduce stress increase calmness clarity and happiness Billionaire hedge fund manager Ray Dalio was quoted as saying Meditation more than anything in my life was the biggest ingredient of whatever success I ve had We often catch ourselves in obsessive thinking or spending many hours every day gaming or browsing online may go unnoticed Meditation is the first step to reaching a higher level of awareness inner calm and mindfulness It isn t about trying to empty your mind Instead the practice involves paying close attention to the present moment especially our own thoughts and emotions For experienced meditators this book will blow the cobwebs off and invigorate you For a beginner this book has all you need to master your mind In this book you will discover How to sit and what to do with your eyes hands etc Using the five senses to gain clarity and focus Over 9 different ways of meditation choosing the best way for you The 4 most important things you should know about about Meditation How to establish a consistent Meditation practice and make it part of a wider personal development plan Elite level Meditations used daily by superstar basketball player Kobe Bryant Make less mistakes and increase your mental strength The benefits of Moving Meditation 3 ways to start practicing them now Top tips for practicing mindfulness in your everyday life Cultivate antidotes to negative states of mind Techniques to relieve stress anxiety improve your health in just 5 minutes per day Guided Meditations for deep relaxation or sleep And much much more Imagine feeling less stressed and eventually reaching a higher level of awareness and inner calm Even if you re always stressed and don t have enough time you too can find inner peace with just five minutes a day And you won t need an instructor a custom mantra or need to visit a Buddhist Temple All you need is a little patience and the knowledge contained in this book [Attention and consciousness in different senses](#) Naotsugu Tsuchiya,Jeroen J. Van Boxtel,2013-06-03 Although often used in everyday speech and in the scholarly literature selective attention and consciousness lack clear undisputed definitions Partly because of this deficit there exists a lively debate on the relationship between the two Nevertheless attention has been studied scientifically for a long time because a variety of tasks allow researchers to control several of its aspects e g focused and feature based attention Consciousness as a scientific subject of study has emerged more recently but is now rapidly gaining traction Scientific studies of consciousness concern the state or level of consciousness e g awake as opposed to in coma dreamless sleep or under anaesthesia as well as the contents of consciousness or the phenomenology of perception With the increase in consciousness focused research there

is a concomitant surge in research examining the relationship between attention and consciousness This relationship between attention and consciousness is the topic of this Research Topic Contributions related to or focused solely on attention or on consciousness will not be considered It had long been assumed that attention and consciousness are inextricably intertwined two sides of the same coin However recently substantial evidence has emerged that attention and consciousness are interacting but separable processes It is however debated how tight the interactions are and what the exact nature of the relationship is Therefore we invite researchers from different camps to provide opinionated but balanced literature reviews Different groups will interpret the same data in different ways We feel that combining these views in one Research Topic is immensely valuable to researchers from different fields Apart from reviews we also invite potential contributors to provide new and exciting evidence in the form of original contributions that may support any of the different views Even though attention and consciousness are critical aspects of many different cognitive processes they are mainly studied though not exclusively in the domain of visual perception In other sensory modalities e g olfaction or audition it is currently not clear whether distinctions between attention and consciousness exist which is even more true for other cognitive processes such as memory Therefore we specifically invite contributions covering the auditory somatosensory olfactory and memory domain We ask all contributors to provide discussions on the relationship between attention and consciousness and focus on 1 the influence of attention on sensory processing 2 the formation of conscious perception 3 the evidence for unconscious processing and its modulation by attention 4 potential indications for dissociations between attention and consciousness e g does paying attention to a stimulus decrease performance on e g a discrimination task 5 neuroimaging and neurophysiology data pertaining to these questions Often one is caught in one s own research field and lacks the time or the knowledge to delve into another field This Research Topic should provide a great overview in great breadth of the current state of knowledge on the links between attention and consciousness and their interactions in several different sensory modalities
