**Microfinance, Debt and Over-Indebtedness** Isabelle Guérin, Solène Morvant-Roux, Magdalena Villarreal, 2013-10-15 Although microcredit programmes have long been considered efficient development tools many forms of debt induced distress have emerged in their wake This has brought to light the problem of over indebtedness a topic which has been previously underexplored in the literature This new book from a group of leading scholars explores the manifestations scale and economic and social implications of household over indebtedness in areas conventionally considered as financially excluded The book approaches debt not only as a financial transaction but also as a form of social bond and offers a socioeconomic analysis of over indebtedness The volume puts forward a broad definition of over indebtedness highlighting its situational and semantic complexity and diversity It provides a close analysis of local conceptions of debt and over indebtedness highlighting frameworks of calculation and the constant renegotiation of their boundaries On top of this it looks far beyond microcredit to examine all the financial practices that individuals juggle The volume argues that over indebtedness has more to do with social inequalities than financial illiteracy and should therefore be understood in the light of global trends of financialization It also reveals the ambiguity of financial inclusion policies and in many respects questions the actions of new credit providers This book will be valuable reading for students researchers and policy makers interested in microfinance and development issues Behavioral Addictions Nancy M.
