Turquoise Mosaics From Mexico:

Turquoise Mosaics from Mexico Colin McEwan, 2006 The nine turquoise mosaics from Mexico are some of the most striking pieces in the collections of the British Museum Among the few surviving such artifacts these exquisite objects include two masks a shield a knife a helmet a double headed serpent a mosaic on a human skull a jaguar and an animal head They all originate from the Mixtec and Aztec civilizations first encountered by Europeans during the Spanish conquest in the early sixteenth century The mosaics have long excited admiration for their masterful blend of technical skill and artistry and fascination regarding their association with ritual and ceremony Only recently though have scientific investigations undertaken by the British Museum dramatically advanced knowledge of the mosaics by characterizing for the first time the variety of natural materials that were used to create them Illustrated with more than 160 color images this book describes the recent scientific findings about the mosaics in detail revealing them to be rich repositories of information about ancient Mexico The materials used to construct the mosaics demonstrate their makers deep knowledge of the natural world and its resources The effort that would have been involved in procuring the materials testifies to the mosaics value and significance in a society imbued with myths and religious beliefs The British Museum's analyses have provided evidence of the way that the materials were prepared and assembled the tools used and the choices that were made by artisans In addition by drawing on historical accounts including early codices as well as recent archaeological discoveries specialists have learned more about the place of the mosaics in ancient Mexican culture Filled with information about the religion art and natural and cultural history as well as the extraordinary ability of modern science to enable detailed insight into past eras *Turquoise Mosaics from Mexico* offers an overview of the production utilization and eventual fate of these beautiful and mysterious objects

Collecting Mesoamerican Art before 1940 Andrew D. Turner, Megan E. O'Neil, 2024-02-13 The untold chronicles of the looting and collecting of ancient Mesoamerican objects This book traces the fascinating history of how and why ancient Mesoamerican objects have been collected It begins with the pre Hispanic antiquities that first entered European collections in the sixteenth century as gifts or seizures continues through the rise of systematic collecting in Europe and the Americas during the nineteenth and twentieth centuries and ends in 1940 the start of Europe s art market collapse at the outbreak of World War II and the coinciding genesis of the large scale art market for pre Hispanic antiquities in the United States Drawing upon archival resources and international museum collections the contributors analyze the ways shifting patterns of collecting and taste including how pre Hispanic objects changed from being viewed as anthropological and scientific curiosities to collectible artworks have shaped modern academic disciplines as well as public private institutional and nationalistic attitudes toward Mesoamerican art As many nations across the world demand the return of their cultural patrimony and ancestral heritage it is essential to examine the historical processes events and actors that initially removed so many objects from their countries of origin
