Urban Culture:

Cities of Culture Deborah Stevenson, 2013-08-15 Culture now has a prominent place on the urban policy and re-profiling agendas of cities around the world. City-based cultural planning emphasising creativity in all its guises has emerged as a significant local policy initiative while the notion of the creative city has become an urban imaging cliché. The proliferation of local blueprints for cultural planning creative cities has been remarkable while supra-state bodies such as the European Union and UNESCO are also fostering the use of culture in strategies to revive cities and urban economies and to brand places as different. *Cities of Culture* highlights significant trends in cultural planning since its inception revealing and analysing key discourses and influential globally circulating manifestos and processes as well as their interpretation and implementation in specific places. With reference to examples drawn from Europe, Australia, Asia and North America *Cities of Culture* provides insights into the application of urban cultural strategies in different local, national and international contexts highlighting regularities, tensions and intersections as well as core underpinning assumptions. This book explores the now pervasive expectation that cultural planning is capable of achieving a wide range of social, economic, urban and creative outcomes. It will be of interest for students and scholars of urban sociology, urban studies, cultural policy studies and human geography.

Planning and Designing Sustainable and Resilient Landscapes Cerasella Crăciun, Maria Bostenaru Dan, 2014-02-03 This book deals with planning issues in landscape architecture which start at the evaluation of the existing fabric of society, its history and memory approached and conserved through photography, film and scenographic installations a way in which the archetypes can be investigated be it industrial derelict sites or already green spaces and cultural landscapes. It provides approaches to intervention through rehabilitation and upgrade eventually in participative manner. To such evaluation and promotion a couple of disciplines can contribute such as history of art, geography and communication science and of course landscape architecture. The field of landscape architecture reunites points of view from such different disciplines with a view to an active approach a contemporary intervention or conservation. The book presents case studies from several European countries: Romania, Germany, Austria, Italy, Portugal mostly for large landscape in the outskirts of the cities and in the parks.

The Reportage of Urban Culture Rolf Lindner, 1996-07-11 Fascination with urban life has encouraged a growing interest in the Chicago School of sociology by students of sociological history. It is generally accepted that the field research practised by the Chicago sociologists during the 1920s, the Golden Age of Chicago sociology used methods borrowed from anthropology. However, Rolf Lindner also argues convincingly that the orientation of urban research advocated by Robert Park, the key figure in the Chicago School and himself a former reporter, is ultimately indebted to the tradition of urban reportage. *The Reportage of Urban Culture* goes beyond a thorough reconstruction of the relationship between journalism and sociology. It shows how the figure of the city reporter at the turn of the century represents a different way of looking at life and reflects a transformation in American culture from rejecting variety to embracing it. **Cities and**
