Darwin Comes to Town Menno Schilthuizen, 2018-04-03 With human populations growing we re having an increasing impact on global ecosystems and nowhere do these impacts overlap as much as they do in cities Urban ecologists study how our manmade environments are changing the evolution of the animals and plants around us Schilthuizen takes us around the world for an up close look at just how stunningly flexible and swift moving natural selection can be He shows how the wildlife sharing these spaces with us is not just surviving but evolving ways of thriving [Feral Cities](#) Tristan Donovan, 2015-04-01 We tend to think of cities as a realm apart somehow separate from nature but nothing could be further from the truth In *Feral Cities* Tristan Donovan digs below the urban gloss to uncover the wildlife that we share our streets and homes with Along the way readers will meet the wall eating snails that are invading Miami the wild boars that roam Berlin and the monkey gangs of Cape Town From carpet hungry bugs to coyotes hanging out in sandwich shops *Feral Cities* takes readers on a journey through streets that are far more alive than we often realize shows how the animals are adjusting to urban living and investigates how human attitudes and culture influence wildlife issues in urban areas *The Hood Comes First* Murray Forman, 2024-08-06 *The Hood Comes First* looks at the increasingly specific emphasis on real neighborhoods and streets in rap music and hip hop culture as an urgent response to the cultural and geographical ghettoization of black urban communities Examining rap music along with ancillary hip hop media including radio music

Urban Jungle Ben Wilson,2023-03-07 In this exhilarating look at cities past and future Ben Wilson proposes that in our world of rising seas and threatening weather the natural world may prove the city's savior Illuminating Wilson leaves readers with hope about the future of efforts to preserve the ecosystems that surround us as well as a new perspective that looks beyond the concrete and asphalt when walking along a city's streets Associated Press Since the beginning of civilization humans have built cities to wall nature out then glorified it in beloved but quite artificial parks In Urban Jungle Ben Wilson the author of Metropolis a seven thousand year history of cities that the Wall Street Journal called a towering achievement looks to the fraught relationship between nature and the city for clues to how the planet can survive in an age of climate crisis Whether it was the market farmers of Paris Germans in medieval forest cities or the Aztecs in the floating city of Tenochtitlan pre modern humans had an essential bond with nature But when the day came that water was piped in and food flown from distant fields that relationship was lost Today urban areas are the fastest growing habitat on Earth and in Urban Jungle Ben Wilson finds that we are at last acknowledging that human engineering is not enough to protect us from extremes of weather He takes us to places where efforts to rewild the city are under way to Los Angeles where the city's concrete river will run blue again to New York City where a bleak landfill will be a vast grassland preserve The pinnacle of this strategy will be Amsterdam a city that is its own ecosystem that makes no waste and produces its own energy In many cities Wilson finds nature is already thriving Koalas are settling in Brisbane wild boar may raid your picnic in Berlin Green canopies wildflowers wildlife the things that will help cities survive he notes also make people happy Urban Jungle offers the pleasures of history how backyard gardens spread exotic species all over the world how war produces biodiversity alongside a fantastic vision of the lush green cities of our future Climate change Ben Wilson believes is only the latest chapter in the dramatic human story of nature and the city

The Sacred in the City Liliana Gómez,Walter Van Herck,2012-02-09 This book reflects the way in which the city interacts with the sacred in all its many guises with religion and the human search for meaning in life As the process of urbanization of society is accelerating

thus giving an increasing importance to cities and the metropolis it is relevant to investigate the social or cultural cohesion that these urban agglomerations manifest Religion is keenly observed as witnessing a growth crucially impacting cultural and political dynamics as well as determining the emergence of new sacred symbols and their inscription in urban spaces worldwide The sacred has become an important category of a new interpretation of social and cultural transformation processes From a unique broader perspective the volume focuses on the relationship between the city and the sacred Taking a multidisciplinary approach combining the expertise of philosophers historians architects social geographers sociologists and anthropologists it draws a nuanced picture of the different layers of religion of the sacred and its diverse forms within the city with examples from Europe South America and the Caribbean and Africa

City Critters Nicholas Read, 2012-04-01 When we think of wild animals we don't immediately associate them with the cities we live in But a closer look soon reveals that we share our urban environment with a great many untamed creatures Heavily illustrated and full of entertaining and informative facts City Critters examines how and why so many wild animals choose to live in places that on first glance at least seem contrary to their needs How do those deer raccoons squirrels skunks coyotes crows gulls and geese not to mention the alligators eagles otters and snakes manage to survive in the big city What special skills do city critters have that many of their wilderness cousins lack Why have they developed these skills And what are our responsibilities in ensuring that these animals can continue to share our city lives

Green Obsession Stefano Boeri Architetti, 2021-12-09 Green Obsession traces the long path that architect Stefano Boeri and his studio Stefano Boeri Architetti have followed in the last fifteen years of practice aiming at the redefinition of the relationship between city and nature The book follows a discursive thread alternating dialogues and scientific essays by some of the main protagonists who have contributed to widening the perspective on this subject helping to raise awareness while protecting the world and its biodiversity Cities have contributed for centuries to the promotion of some of humanity's greatest ideas we must now urgently include them as among the principal players in the environmental debate and at the forefront of any policy tackling and countering possibly reversing climate change Nevertheless even today one of the most significant technologies capable of absorbing CO₂ and restoring our environment is photosynthesis Planting trees in addition to protecting existing natural areas and biodiversity together with de-carbonization renewable energies digitalization smart mobility and the circular economy could be the set of strategies necessary to tackle climate change Today the effects of the Anthropocene age are ever more visible changing our environment and affecting every species that lives within it Green Obsession offers a path to be taken a hard but still necessary paradigm shift even for architecture and urbanism that aims to give a voice to this much needed ecological transition This book aims to unveil the processes and the complexity involved in the search for a new kind of urbanism while raising questions and opening old wounds related to the relationship between the human species and Nature and finally putting these fragments together to create a portrait of our era We need to conceive cities as new green catalysts Now more

than ever it is essential to act together as separate individuals and professionals joining the cause as members of the global community with a shared environmental strategy We all have to open the era of a new alliance between Nature and City With Contributions from Emanuele Coccia Jane Goodall Paul Hawken Cecil Konijnendijk David Miller Harini Nagendra Giuseppe Sala and Giorgio Vacchiano
