Growth in Indonesia Blane D. Lewis,2010 This study examines the impact of demographic change and urbanization on economic growth in Indonesia from 1960 2007 The analysis shows that economic growth is positively related to both the level

and the rate of change of the working age population Economic growth is also positively associated with the level of urbanization But increases in the rate of urbanization negatively affect growth in fact they swamp the positive level effects The decreasing primacy of Jakarta also has a negative impact on economic growth All things considered Indonesia appears to be adapting well to the momentous changes in demographics that it is experiencing But the country must rethink its approach to urbanization with a view to realizing the potential agglomeration economies that have apparently accrued to other countries during the course of development In order to do this the public sector will have to significantly increase its investment in urban infrastructure

Cities and the Economy PASCUAL. BERRONE, Ana Duch T-Figueras, 2017-01-27 Cities are the engines of growth for most national economies. As centers of production, innovation, creativity, trade, and connectivity, urban areas are taking a leading role in stimulating global economic growth and competitiveness, resulting in higher incomes per capita and higher productivity. However, cities can also be places where some of the most important challenges of the 21st century, such as inequality, unemployment, segregation, and poverty, are concentrated and exacerbated. How can cities balance the economic advantages they have and the associated challenges brought by rapid urbanization and economic growth? What is the role of local governments in achieving and ensuring sustainable economic growth and facilitating job creation? Can cities foster economic development? This volume is part of a book series called IESE Cities in Motion International Urban Best Practices. *Cities and the Economy* focuses on how cities can address these challenges in order to achieve sustainable economic growth and assess the role of city governments and firms in promoting and ensuring local economic development. The book aims to be an insightful analysis of the main urban economic trends and challenges, a collection of international best practices on sustainable urban economies and local economic development, a tool to help city managers and policymakers in their endeavors to develop and deploy policies and initiatives to achieve urban areas that are economically, socially, and environmentally sustainable.

Cities and Economic Development Paul Bairoch, 1988 When and how were cities born? Does urbanization foster innovation and economic development? What was the level of urbanization in traditional societies? Did the Industrial Revolution facilitate urbanization? Has the growth of cities in the Third World been a handicap or an asset to economic development? In this revised translation of *De Jericho Mexico*, Paul Bairoch seeks the answers to these questions and provides a comprehensive study of the evolution of the city and its relation to economic life. Bairoch examines the development of cities from the dawn of urbanization, Jericho, to the explosive growth of the contemporary Third World city. In particular, he defines the roles of agriculture and industrialization in the rise of cities. A hefty history from the Neolithic onward, it's ambitious in scope and rich in subject, detailing urbanization and, of course, the links between cities and economies. Scholarly, accessible, and significant. *Newsday*. This book offers a path-breaking synthesis of the vast literature on the history of urbanization. John C. Brown, *Journal of Economic Literature*. One leaves this volume with the feeling of positions intelligently argued and related to the existing state of theory and knowledge. One also has the pleasure of reading a book unusually well written. It will long both be a standard and stimulate new thought on the central issue of urban and economic growth. Thomas A. Reiner, *Annals of the American Academy of Political and Social Science*.
