Whats The Time

IM Harris

Whats The Time:

What is the time? Aleksandr Anufriyev,2019-02-28 Time is a complex notion that includes a logical procedure for determining the stages of a process event and logical information data necessary to perform such a logical procedure It uses an algorithm for comparing and contrasting known or standard events processes with events processes that need to be understood to determine the stages of existence or to plan their implementation This book is for every age anyone who can read and who is interested in what time it will be the main audience It explains why people think time is relative and what is time and gives the audience examples of different devices to measure time If you want to know how to better explain to your kids your friends or your students what Time means then in this book you will find the answers First let me tell you how and why I wrote this book Long ago in the year 2014 I was in the park with my daughter She was in middle school and well educated about many things nowadays life Suddenly she asks me one very simple question Daddy what is time I try to make it simple but understand during our conversation that it will be not easy and no simple answer And it is completely understandable Look at one of the oldest and most respectable dictionaries Merriam Webster since 1828 Definition of time according to Merriam Webster Definition of time The measured or measurable period during which an action process or condition exists or continues Definition of the period The completion of a cycle a series of events or a single action Definition of duration The time during which something exists or lasts If we combine all these definitions we will have a final definition of time The measured or measurable completion of a cycle a series of events or a single action that exists or lasts in time As you can see we use the word time in this final definition It s like saying Time is time The circle is complete In this book you will find a different definition of time Very easy to understand You can tell your kids about it and kids will understand what is time with no trouble at all You will find out where is time came from How the myths about time were created and who invented these fairy tales How did people start to use the generators of standard processes which most people call the time measurement devices You will find the answer to the most intriguing question Is it possible to travel in time You will know where you can travel and where you can not This trip starts a long time ago when Homo sapiens live in a cave and ended up today when people dreamed about life inside Virtual World where are new time and new life exists But first let s talk about time in our world the world of processes events and material objects Happy reading What Is the Time? Keithlind . R. E. Bynoe,2007-11 Timely and divinely inspired this work covers a basic history of the Jewish people *WHAT IS TIME? WHAT IS THE ORIGIN OF TIME AND THE SENSE OF DURATION?* Samuel K. K. Blankson,2017-03-31 The cosmos itself is not governed or regulated by time but by chance so cosmology can never appear consistently logical Time and regulation are human concepts The points and instants notion is no longer credible Points are our basic intellectual tools since the instants arise through moving from point to point making time discrete A N Whitehead s definition of time as a sequence of non interacting moments is credible Russell also said There is no longer a universal time And Professor Eddington observed that

time does not flow The Minkowski 4 D geometry is seen as plainly false and so time travel is impossible There are no days in nature at all There is only one constant day All existence is daylight The nights are freakish and irrelevant The earth's rotations are just flippant shadows over reality Nothing in astronomy happens only by night and not by day Logically deduced time appears to be human and we can solve the problem of how it passes by too
