Writing Women- Writing Power Greg Kucich, Keith Hanley, **The Frontiers of Women's Writing** Brigitte

Georgi-Findlay, 2022-05-10 Although the myth of the American frontier is largely the product of writings by men a substantial body of writings by women exists that casts the era of western expansion in a different light In this study of American women s writings about the West between 1830 and 1930 a European scholar provides a reconstruction and new vision of frontier narrative from a perspective that has frequently been overlooked or taken for granted in discussions of the frontier Brigitte Georgi Findlay presents a range of writings that reflects the diversity of the western experience Beginning with the narratives of Caroline Kirkland and other women of the early frontier she reviews the diaries of the overland trails letters and journals of the wives of army officers during the Indian wars professional writings focusing largely on travel by women such as Caroline Leighton from the regional publishing cultures that emerged in the Far West during the last quarter of the century and late nineteenth and early twentieth century accounts of missionaries and teachers on Indian reservations Most of the writers were white literate women who asserted their own kind of cultural authority over the lands and people they encountered Their accounts are not only set in relation to a masculine frontier myth but also investigated for clues about their own involvement with territorial expansion By exploring the various ways in which women writers actively contributed to and at times rejected the development of a national narrative of territorial expansion based on empire building and colonization the author shows how their accounts are implicated in expansionist processes at the same time that they formulate positions of innocence and detachment Georgi Findlay has drawn on American studies scholarship feminist criticism and studies of colonial discourse to examine the strategies of women s representation in writing about the West in ways that most theorists have not She critiques generally accepted stereotypes and assumptions both about women s writing and its difference of view in particular and about frontier discourse and the rhetoric of westward expansion in general as she offers a significant contribution to literary studies of the West that will challenge scholars across a wide range of disciplines

Writing Women's History Since the Renaissance Mary Spongberg, 2017-03-08 The complaint of Catherine Morland in Jane Austen s *Northanger Abbey* that history has hardly any women at all is not an uncommon one Yet there is evidence to suggest that women have engaged in historical writing since ancient times This study traces the history of women s historical writing reclaiming the lives of individual women historians recovering women s historical writings from the past and focusing on how gender has shaped the genre of history Mary Spongberg brings together for the first time an extensive survey of the progress of women s historical writing from the Renaissance to the present demonstrating the continuities between women s historical writings in the past and the development of a distinctly woman centred historiography *Writing Women s History since the Renaissance* also examines the relationship between women s history and the development of feminist consciousness suggesting that the study of history has alerted women to their unequal status and enabled them to use history

to achieve women's rights. Whether feminist or anti-feminist, women who have had their historical writings published have served as role models for women seeking a voice in the public sphere and have been instrumental in encouraging the growth of a feminist discourse.

Writing Women's Literary History Margaret J. M. Ezell, 1996-11-08 Ezell critically examines these successful women's literary histories and applies to them the same self-conscious feminism that critics have applied to more traditional methods. Drawing both on French feminisms and on recent historicist scholarship, Ezell points us to new possibilities for the recovery of early modern women's literary history. By championing the recovery of lost women writers and insisting on reevaluating the past, women's studies and feminist theory have effected dramatic changes in the ways English literary history is written and taught.

In *Writing Women's Literary History*, Margaret Ezell critically examines these successful women's literary histories and applies to them the same self-conscious feminism that critics have applied to more traditional methods. According to Ezell, by relying not only on past male scholarship but also on inherited notions of tradition, some feminist historicists replicate the evolutionary narrative model of history that originally marginalized women who wrote before 1700. Drawing both on French feminisms and on recent historicist scholarship, Ezell points us to new possibilities for the recovery of early modern women's literary history.

Writing, Gender and State in Early Modern England Megan Matchinske, 1998-05-28 The period from the Reformation to the English Civil War saw an evolving understanding of social identity in England. This book uses four illuminating case studies to chart a discursive shift from mid-sixteenth century notions of an individually generated, spiritually motivated sense of identity to Civil War perceptions of the self as inscribed by the state and inflected according to gender, a site of civil and sexual invigilation and control. Each centres on the work of an early modern woman writer in the act of self-definition and authorization in relation to external powers such as the Church and the monarchy. Megan Matchinske's study illustrates the evolving relationships between public and private selves and the increasing role of gender in determining different identities for men and women. The conjunction of gender and statehood in Matchinske's analysis represents an original contribution to the study of early modern identity.
