Written On A Body:

Written on the Body Jeanette Winterson, 1994-02-01 The most beguilingly seductive novel to date from the author of *The Passion and Sexing the Cherry* Winterson chronicles the consuming affair between the narrator who is given neither name nor gender and the beloved a complex and confused married woman At once a love story and a philosophical meditation New York Times Book Review

Body Image and Identity in Jeanette Winterson's "Written on the Body" Britta Sonnenberg, 2004-06-18 Seminar paper from the year 2003 in the subject English Language and Literature Studies Literature grade 2 0 B University of Cologne English Seminar course Hauptseminar Writing with a Difference language English abstract Jeanette Winterson's *Written on the Body* 1990 draws a realistic picture of twentieth century England but in contrast to the majority of post modern works that display chaos and displacement often accompanied by apocalyptic future visions *Written on the Body* sets love and trust against individualism and control The simple plot of the story as well as the overload of metaphors and imagery have misled some critics into judging the novel as trivial and romantic but a closer look clearly does not hold that interpretation The use of imagery and fantastic elements is much too pointed to be read as mere poetic illustration of romantic feelings In fact what seems trivial and naive at the surface appears highly thought through at a deeper look *Written on the Body* is a notable comment on society's perception of gender and identity The ostentatious playing with cultural conventions and assumptions related to sexual relationships and the female body constitutes a sociocritical statement which is artistically wrapped up in a melodramatic love affair It challenges the conventional binary gender system although at the same time it seems itself trapped in this system In this paper I want to explore the representation of body gender and identity in *Written on the Body*

3D-Printed Body Architecture Neil Leach, Behnaz Farahi, 2017-12-18 Some architects dream of 3D printing houses Some even fantasise about 3D printing entire cities But what is the real potential of 3D printing for architects This issue focuses on another strand of 3D printing practice emerging among architects operating at a much smaller scale that is potentially more significant Several architects have been working with the fashion industry to produce some exquisitely designed 3D printed wearables Other architects have been 3D printing food jewellery and other items at the scale of the human body But what is the significance of this work And how do these 3D printed body scale items relate to the discipline of architecture Are they merely a distraction from the real business of the architect Or do they point towards a new form of proto architecture like furniture espresso makers and pavilions before them that tests out architectural ideas and explores tectonic properties at a smaller scale Or does this work constitute an entirely new arena of design In other words is 3D printing at the human scale to be seen as a new genre of body architecture This

issue contains some of the most exciting work in this field today and seeks to chart and analyse its significance Contributors include Paola Antonelli MoMA Francis Bitonti Niccolo Casas Behnaz Farahi Madeline Gannon Eric Goldemberg MONAD Studio Kyle von Hasseln 3D Systems Culinary Lab Rem D Koolhaas Julia Krner Neil Leach Steven Ma Xubance Neri Oxman MIT Media Lab Ronald Rael and Virginia San Fratello Gilles Retsin Jessica Rosenkrantz Nervous System and Patrik Schumacher Zaha Hadid Architects
